Dr. Ronald Gonzo, the director of a local university, State Tech, wants to use a standardized personality test to help find the best candidates for new teachers. Based on our in-class activity, prepare a report that answers the following questions:

- 1. What kind of personality test should be used? Why?
- 2. Based on the results of the "color test", which candidates are the most suitable for work as teachers? Why?

Remember: you should follow the conventions of report writing for a formal audience. Your response should be between 230 and 270 words.

*Bonus Requirement: use three new vocabulary words from our vocabulary quizzes this semester. Be sure to <u>underline</u> and <u>highlight</u> these words!
