Summary

Software Engineer with over five years of experience delivering scalable and high-performing applications with user-friendly interactions that drive business growth and improve UX.

Technologies

TypeScript, Node.js, React.js, Next.js, Remix.run, Vue, Nuxt, Expressjs, Nestjs, PHP, Laravel, Chart libraries, MongoDB, Postgresql, Mysql, Socket.io, AWS

Experience

DECEMBER 2024 - PRESENT

Lumilearn - Senior Frontend Engineer (Nigeria)

- Building an e-learning web app using tools like React, TypeScript, tailwindcss, and JavaScript.
- Implementing livestream features to enable a classroom environment for tutors and students
- Translating Figma designs into pixel-perfect user interfaces.

Tools/Technologies - Typescript, Javascript, Reactjs, Remix.run

APRIL 2024 - JAN 2025

Medplus Pharmacy - Senior Software Engineer (Nigeria)

- Developed and launched three strategic software products that increased the company's online visibility within 4 months.
- Developed an inventory tracking system that reduced stock discrepancies by 100%, ensuring consistent product availability and minimising lost sales.
- Created a robust e-commerce platform that facilitated seamless purchasing of drugs and non-drug products, scaling to handle multiple transactions.
- Collaborated with marketing, sales, and operations teams to ensure software aligned with business objectives, driving company-wide adoption of new systems.
- Built a customer-facing application that enhanced purchasing convenience, leading to a 45% increase in repeat purchases.
- Collaborated closely with the Marketing and Product teams to understand and help improve user traffic to different landing pages.

Tools/Technologies - Typescript, Javascript, Reactjs, Remix.run, Expressjs, Nodejs, Laravel, PHP

SEPTEMBER 2021 - APRIL 2024

Decagon - Senior Frontend Engineer (Nigeria)

- Delivered various applications using tools like React, TypeScript, Tailwind, and JavaScript.
- Led multiple teams to translate Figma designs into pixel-perfect user interfaces.
- Managed a team of three engineers to rebuild the recruitment platform, which increased the number of applications by 50%.
- Coordinated the frontend team to build an enterprise application that improves resource planning, customer relationships and business processes.
- Collaborated closely with the Marketing and Product teams to understand and help improve user traffic to different landing pages.
- Collaborated closely with Marketing and Product teams to analyse user traffic patterns and identify opportunities for optimisation, resulting in a 70% increase in conversion rates across multiple landing pages.
- Worked in an agile and iterative way in collaboration with the stakeholders, product managers, and scrum masters to deliver an efficient user experience for various products.
- Worked closely with backend engineers to integrate front-end components with server-side logic and APIs.
- We built a custom OAuth 2.0 Identity provider with Keycloak software across different internal applications.

Tools/Technologies - Typescript, Javascript, Reactjs, Remix.run

SEPTEMBER 2022 - MAY 2023

Zarttech - Fullstack Engineer (Netherland)

- Ensured efficient documentation of backend features and APIs for ease of use and integration for the frontend team.
- Developed a human-driven conversational platform that enables a real-time recruitment process, which improves hiring.
- Automated deployment using GitHub actions, Docker to AWS service.
- Built backend services for an e-commerce and fintech application using tools like Nest.js and TypeScript.

Tools/Technologies - AWS, Docker, Reactjs, Nestjs, Typescript, Nodejs

SEPTEMBER 2021 - FEBRUARY 2022

NextHandle - Frontend Developer (Nigeria)

- Built stable and maintainable codebases using Next.js, React.js, Typescript and Javascript.
- Managed API requests using React-Query and state management with the Context API.
- Built an E-commerce application with exciting features like checkout, product management, and payment integration.
- Introduced and enforced consistent coding conventions and standards across the application.

Tools/Technologies - Next.js, React.js, Context API, React-Query.

MAY 2021 - SEPTEMBER 2021

Tech4Dev - Backend Facilitator (Nigeria)

- Implemented different test integrations to scale assessment processes for the backend team using the Jest library.
- Mentored and assisted over 40 developers in building several applications with Node.js.
- Implemented CI/CD pipeline using GitHub Actions.
- Led a team of UI/UX designers, frontend developers, and backend developers to build a tax collector application.

Tools/Technologies - JavaScript, Node.js, Jest, GitHub Actions

DECEMBER 2020 - MAY 2021

Teporteccloud - Software Engineer (Nigeria)

- Developed high-quality, high-performance and maintainable web apps using the latest technologies in web development.
- Handled full-stack (front-end and back-end) development for a job search application using React.js, Node.js, Express.js, and an MVC framework for 4 months.
- In charge of making architectural decisions to improve the development process and increase the maintainability of the apps.
- Mentored, trained and supported junior engineers to develop their frontend skills.

Tools/Technologies - HTML/CSS/SASS, Figma, JavaScript, MongoDB, Node.js, React.js, Jenkins, Nginx, Git.

OCTOBER 2019 - JANUARY 2020

HNG - Frontend Developer

- Worked closely with designers and the management team to convert designs into pixel-perfect mockups.
- Designed and implemented a cross-browser, IE-11 compatible marketing site.
- Used various collaboration tools daily to communicate and work with product managers, developers and designers.

Tools/Technologies - PHP, Embedded JavaScript (EJS), Node.js, JavaScript

DECEMBER 2018 - JUNE 2019

Beam Agency - Frontend Developer

- Built front-end applications for several clients. Most especially HTML/CSS and JavaScript applications.
- Worked closely with the team to translate design mock-ups into elegant, fast, responsive websites and web applications.

Tools/Technologies - HTML5, CSS3, JavaScript, Github.

Volunteer

Andela Learning Community

- Helped developers understand some concepts in web development, like service workers and how to use them to develop offline apps.
