

Privacy Policy for UI Bug Detector Chrome Extension

Effective Date: 03/08/2025

Introduction

Your privacy is important to us. This Privacy Policy outlines how **UI Bug Detector**, developed by **MD AQUIL**, handles data when you use our Chrome extension to scan webpages, detect UI and functional bugs, and generate structured reports.

Information Collection and Use

The UI Bug Detector extension **does not collect, store, or transmit any personal data to external servers**. All scans, bug details, and generated reports remain **local to your browser** and are never shared with third parties. The extension operates entirely on-device and only functions when explicitly triggered by the user.

Permissions

UI Bug Detector requires the following Chrome permissions solely to perform its intended core functionality:

- **storage:**
Used to temporarily store scan results, user settings, and report preferences within the browser session. No data is synced or shared externally.
- **activeTab:**
Grants access to the currently active tab only when the user initiates a bug scan or report generation. This is required to extract relevant content from the open webpage.
- **tabs:**
Used to retrieve basic metadata like tab URL and title to label the report and provide context. This helps in organizing and referencing the scan results properly.
- **host permissions** (<all_urls> or "*://*/*"):
Required to inject content scripts into the current web page for analyzing its DOM structure, layout, and UI elements. This permission is only used while actively scanning a page.

Data Security

All data analyzed or generated by UI Bug Detector (such as bug lists or HTML/PDF reports) remains within the user's local browser environment. The extension does **not transmit any data** to servers, does **not collect identifiable information**, and does **not use analytics or third-party tracking tools**.

Changes to This Privacy Policy

This Privacy Policy may be updated periodically. Any changes will be reflected on this page with an updated effective date.
