AI Unlimited broke the **3.000+ sales barrier** and with TalkFree AI with all the new additions and bonuses is going to be really big. If you promoted AI Unlimited you'll have approval for sure.

## TalkFree AI

TalkFree AI is an info product that offers curated online information about creating unlimited AI generated texts. It gives you about 10 different options to do that, even one of them is the installation of a local software (PC/MAC) to run the prompts without an online connection.

Up to 10 options to create your own online Artificial Intelligence Texts based on prompts

Most of these options are free and unlimited.

You have access to a public software to run your model in your computer (PC/MAC). You will need a decent amount of RAM memory (at least 12Gb) to make it work fast. If you don't have it, no problem, there are more options in this infoproduct.

How to access all these online generators. There's a lot of mess online, so I made the work for you to get the best in the market. I'll update as new ones flourish!

When I speak about "Unlimited" I mean a normal and fair use of the service. If you're planning to do 500 prompts per day you should be looking for other kinds of products.

You can start promoting right now with everything you need.
