SUMMARY

Frontend Developer with hands-on experience delivering freelance projects and mentoring others through training programs. Passionate about creating user-friendly interfaces and helping teams build clean, maintainable web applications.

RELEVANT EXPERIENCE

Frontend Engineer

Smart Farm Management System

Remote

May 2025 – Nov 2025

- Led the frontend development of a smart farm management platform, guiding UI design and implementation for a responsive, user-friendly system.
- Collaborated with backend developers to align API integration and ensure smooth data workflows.
- Focused on usability, performance, and delivering a modern interface supporting multiple user roles and RTL layout.

React Instructor

PalSoft Technology Solutions

Remote

Sep 2024 – Dec 2024

- Trained interns on advanced React concepts and best development practices.
- Led hands-on projects across core frontend topics (authentication, state, routing, data), using modular API service layers to deliver maintainable admin tools.

Frontend Intern

Foothill Technology Solutions

Hybrid

Mar 2023 – Jul 2023

- Completed an intensive React internship, used Git/GitHub, React+TypeScript, testing, and design patterns while practicing API integration, routing, and state management in production-like tasks.
- Built and deployed multiple projects including [Shopping Hup](#) and [POS System](#)

JavaScript Co-Instructor

IEEE & Gaza Sky Geeks

Hybrid

Aug 2023 – Sep 2023

- Delivered a 32-hour JavaScript training (ES6+ & DOM) to 30+ students with practical exercises.

HTML & CSS Course Instructor

IEEE AAUP

Remote

Apr 2025 - Jul 2025

- Managed an online HTML & CSS course for 50 students, organizing weekly meetings, grading assignments, and providing academic support.

PROJECTS

- [Rent Car](#): Responsive React car rental site with search, booking, and clean UI.
- [Threads App](#): Next.js + TypeScript social app with Clerk auth and threaded posts.
- [Memory Game](#): JavaScript card-matching game with simple animations.

EDUCATION

Arab American University

Palestine, Jenin

BSc in Computer Systems Engineering

2021 – 2026

SKILLS

- TypeScript, React, Tailwind CSS (v4), MUI, React Query, Redux Toolkit, Redux Saga, Express.js, MongoDB, Git & GitHub, Figma, Storybook, Zustand, Yup & Formik, React Testing.

GRADUATION PROJECT

Jawed AI - Intelligent Quran Recitation Feedback System

Mar 2025 – Jan 2026

- Prototyped Arabic ASR (Wav2Vec2) pipeline to flag Tajweed rule violations with low-latency feedback.
