Now you can change your password to something more user-friendly that you will easily remember going forward by completing the following steps.

1. Log onto **TM Web** with new, system-generated password.

The login form is set against a scenic background image of a forest with a large tree on the right and a bird in flight in the center. A bright green circle highlights the 'UserID' and 'Password' input fields, with a green arrow pointing from the left towards the circle.

2. Once you're logged in, click "My Account" in upper right corner.

3. Enter "old" system-generated password, then create a "new" password that you will remember (enter twice), click RESET PASSWORD, then click "OK".

That should do it. You may have to wait a while for the Troopmaster website to register the reset, so give it some time before logging in with the new password if it doesn't work right away.

IMPORTANT: After you complete the above steps, you can use these new credentials (User ID and new Password) , to log into the new TM Web 2.0 on your mobile phone using the TM Mobile App.
