# Scale your Business. Scale your Impact.

*Join ClimAccelerator to have  
EIT Climate-KIC as a Strategic Investor*

## What's it like to have EIT Climate-KIC in your corner?

Through the ClimAccelerator programme, EIT Climate-KIC is quickly becoming one of the most active early-stage investors in Europe. With a 10+ year track record in accelerating cleantech start-ups like [Lillium](#), [Ynsects](#) and [Climeworks](#), we are known for helping companies fulfill their potential and scale their business internationally. We will support your idea with a **€50.000 investment** without taking a board seat or any governance role. With no valuation cap and a 24-month longstop, we ask for a 20 per cent discount on shares, but only after you raise a round of €250.000.

## What is Climate SAFE?

Climate SAFE is a form of **SAFE Note** or **ASA** (Advanced Subscription Agreement): a convertible investment instrument we've developed as a founder-friendly and efficient way to take equity stakes to support Europe's most exciting climate innovation start-ups.

## What's in it for me and my start-up?

The Climate SAFE Investment involves both **funding (around €25.000) and access to ClimAccelerator**, which comes with a number of associated benefits including (but not limited to):

- Full EIT Climate-KIC Community Membership;
- Fast-track to relevant EU funding opportunities, including the EIC fund;
- Dedicated portfolio manager;
- Extensive training and coaching;
- Fundraising support;
- Help with EU policy updates;
- Access to the ClimAccelerator marketplace and crowdfunding network;
- Carbon impact forecasting, reporting and certification;
- Commercialisation support across C-KIC activities and partners;
- Access to the ClimateHive platform and Seedlegals 'Raise' License;
- Market validation;

## What's in it for EIT Climate-KIC?

We believe that by helping you scale your business, we're helping you scale positive climate impact. Plus, by welcoming Europe's most promising climate innovation start-ups into our **ClimAccelerator programme**, we're creating an inclusive network of green enterprises, investors and entrepreneurs, facilitating the transition towards a net-zero economy. Finally, as a non-profit entity ourselves, any proceeds from our investments allow us to reinvest back into the climate action ecosystem, sustaining a **long-term cycle of climate innovation**.

## Who else is part of Climate SAFE?

So far, we have invested in over 20 start-ups who have since gone on to raise more than €25 million in follow-on funding. Since 2010, ClimAccelerator has been one of the leading cleantech accelerator programmes in the world, helping over **2.500 start-ups** raise more than **€2 billion in follow-on funding**, and creating more than **6.000 jobs** in the process. Having EIT Climate-KIC onboard can help early-stage start-ups prove their climate impact and establish themselves with potential investors.
