**Abstract:** Written briefly in English in one paragraph of 150-200 words, containing background, research objectives, methodology, results, conclusion of the study and your research contributions to science.

**Keywords:** Written in English 4-6 words or groups of words, written alphabetically, use lowercase and ; as

**Article info:** Date Submitted: xxx | Date Revised: xxx | Date Accepted: xxx

## INTRODUCTION

Explaining the background, problems, importance of research, brief literature review that relates directly to research or previous findings that need to be developed, gap analysis and ended with a paragraph of research purposes. A balance must be kept between the pure and applied aspects of the subject. The introduction is presented in the form of paragraphs of approximately 1000 words.

## RELATED WORKS

Related Works is a section in a research paper or thesis that reviews previous studies relevant to the research topic. It provides context, identifies gaps in existing knowledge, and demonstrates how the current study contributes to the field. This section typically summarizes key findings, methods, or approaches from prior research, critically analyzes their strengths and limitations, and connects them to the objectives of the current study.

## METHODS

Make sure that work can be repeated according to the details provided. It contains technical information of the study presented clearly. Therefore, readers can conduct research based on the techniques presented. Materials and equipment specifications are necessary. Approaches or procedures of study together with data analysis methods must be presented.

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left( a_n + b_n \sin \sin \frac{n\pi x}{L} \right) (1)$$

## RESULT AND DISCUSSION

Well-prepared tables and or figures must be of significant feature of this section, because they convey the major observations to readers. Any information provided in tables and figures should no longer be repeated in the text, but the text should focus on the importance of the principal findings of the study. In general, journal papers will contain three-seven figures and tables. Same data can not be presented in the form of tables and figures. The results of the study are discussed to address the problem formulated, objectives and research hypotheses. It is highly suggested that discussion be focused on the why and how of the research findings can happen and to extend to which the research findings can be applied to other relevant problems.

Data	X1	X2
2022	2883	2233
2023	2323	232

## CONCLUSION

Conclusion should be withdrawn on the basis of research findings, formulated concerns and research purposes. Conclusion is presented in one paragraph without numerical form of expression. Explain your research contributions to science.

## ACKNOWLEDGE (Optional)

If any, thanks are addressed to official institutions or individuals who have provided funding or have made other contributions to the research. Acknowledgments are accompanied by a research contract number.

## REFERENCES

Manuscripts are written by using standard citation application (Mendeley/Endnote/Zotero). IEEE reference style is required. All references referred to in the text must be written in the reference list. Preferred references are articles taken from the latest journals / publications no later than 5 years before article submission (paper submission).
