

I. Situation

You're playing as a marine platoon who are returning to base after what seems to have been a successful HaM operation. However while the company was airlifted back to base, the ao started to heat up. You're chinook took an RPG hit and crash landed while still in enemy territory. Your platoon suffered no casualties, but the pilots unfortunately died on landing. HQ is currently trying to determine if more aircrafts can be sent in for an extraction.
