

A lot's changed in the last few years, and much of that change has to do with the way we work. Consider, for instance, the fact that remote work has become increasingly common since 2020. Over 16% of companies in the United States now have fully remote work environments, which means that more than a quarter of all Americans work from home.

The rise of remote work has been made possible by advances in technology, and these advances have brought benefits to many other areas of our lives as well. One of the most exciting developments is telemedicine, which has revolutionized the way people receive medical care. By using digital connectivity, patients can get the support they need, regardless of their location.

At Texas Family Orthodontics, we're proud to be at the forefront of this technological revolution. We offer Grin Dental Monitoring, a cutting-edge system that allows you to straighten your teeth without with fewer office visits than ever before. With this system, you can monitor your treatment progress and communicate with our team from the comfort of your own home.

If you're interested in learning more about Grin Dental Monitoring and Virtual Consultations, we've got you covered. We recently sat down with Dr. Vo to discuss the details of this exciting new technology. Keep reading to learn how Grin Dental Monitoring works, how it can benefit you, and what you need to do to get started.

## The Next Big Thing!

Are you ready for the cutting edge of orthodontic treatment? At Texas Family Orthodontics, we're proud to offer you the most exciting new technologies in the industry, guaranteed to make your smile wider and brighter than ever! Grin takes advantage of the rapidly-developing technology that most of us hold in our pockets every day - and brings all the services of your friendly neighborhood smile specialist directly to your door. By combining your smartphone, the Grin App and Scope, and Dr. Vo's comprehensive know-how and experience in expertly crafting smiles in and around San Antonio and Windcrest, you'll receive a faster, more customizable plan than ever before!

## Why Use Grin?

All across the country, people are learning about the advantages of the Grin Remote Monitoring System. How many people? Well, Grin has had a big impact on the industry and has partnered with such institutions in the field as Oral-B. [Check it out!](#)

Nothing provides the convenience and ease of use of Grin Remote Monitoring. Whether you can't make it into the office for checkups or you just want to have the freedom to open your schedule, the Grin app, scope, and your smartphone can have you working hand-in-hand with Dr. Vo without interrupting the things you want to get done. You can quickly send scans of your teeth to your orthodontist from anywhere and at your convenience. Then Dr. Vo can message you back with her assessment right in the Grin app. Simple and fast!

## HOW IT WORKS

### **Highly Intuitive and easy**

Grin is as simple as calling your friends and family on a video chat or sending an attachment with a work e-mail. There's nothing to it! Dr. Vo and the team here at Texas Family Orthodontics will walk you through the signup process. Then, you'll download the Grin App.

Dr. Vo will provide you with the proprietary Grin Scope®. Once you've got that, it's as simple as attaching it to your phone (Don't worry, there are attachments for all different types of smartphones!) and taking a scan of your teeth. Then, you'll submit the scans to Dr. Vo via the Grin App. You'll be able to include any questions or concerns you may have regarding your overall treatment plan or your progress along with your video. Since Dr. Vo can see your particular questions and concerns, you'll receive just the feedback that's important to you!

Bottom line – Grin makes your orthodontic treatment simple and easy, cuts time at the office, and saves you money in the process.

## What Sorts of Benefits Come With Grin Remote Monitoring?

### **Fewer Office Visits**

You'll spend a lot less time coming into the office and sitting down in the chair. With frequent remotely accessible check-ins, you'll only have to come in when it's *really* necessary!

### **Fine-Tune Your Orthodontic Care**

The more you and Dr. Vo communicate with your Grin Remote Monitoring system, the better we can fine-tune your degree of care. This means you'll always have the confidence and peace of mind that your treatment is going exactly as it should. And with every scan saved, you can easily go back to the beginning to see how far you've come!

### **Highly Convenient and Easy to Use**

Scans can be sent from absolutely anywhere with a wifi connection. And since they only take about 60 seconds, you'll always have time to check in. Nothing could be easier! This frees you up to take care of other priorities.

## Spend Less Time At The Orthodontist But Stay Connected

Here at Texas Family Orthodontics, we make it a priority to develop the best treatment plans for each of our patients that maximize efficiency without sacrificing a bit of care.

This makes Grin a truly great fit. Grin provides you with the professional oversight for your Invisalign or braces treatment that you need, no matter where you are! With the Grinn app, you'll have access to Dr. Vo like never before – this means no more working to schedule an in-person visit that manages to fit into your busy schedule for simple matters like progress updates. Gone are the days of leaving a message and hoping you don't end up playing phone tag for days or weeks. Grin allows you to communicate directly with Dr. Vo , wherever you are, at any time convenient for the both of you.

## Don't Wait! Call Today to Get Connected!
