

Privacy Policy — Habit Tracker

Alex Shilenkov developed the Habit Tracker app as a free application. This SERVICE is provided by Alex Shilenkov at no cost and is intended for use "as is".

This page informs visitors about our policies regarding the collection, use, and disclosure of personal information when using our SERVICE. By choosing to use our SERVICE, you agree to the collection and use of information in accordance with this policy.

Information Collection and Use

The Habit Tracker app stores all habit data (names, schedules, completion history) **locally on your device**. This data is not transmitted to our servers or shared with third parties, except as described below.

The app uses third-party services that may collect information used to identify you.

Link to the privacy policy of third-party service providers used by the app:

- [Google Play Services](#)

Permissions Used by the App

The app requests the following Android permissions, each serving a specific functional purpose:

INTERNET Required by Google Play Services. The app itself does not transmit any user data over the internet.

VIBRATE Used to provide haptic feedback when a habit reminder notification is triggered, enhancing the notification experience.

POST_NOTIFICATIONS (*Android 13+*) Required to display habit reminder notifications. Without this permission, the app cannot notify you about scheduled habits.

SCHEDULE_EXACT_ALARM / USE_EXACT_ALARM Used to schedule habit reminders at precise times you set. Exact alarms ensure your reminders fire at the exact time configured, not approximately.

RECEIVE_BOOT_COMPLETED Allows the app to automatically restore all scheduled habit reminders after the device is restarted or after an app update. Without this, all reminders would be lost after a reboot.

REQUEST_IGNORE_BATTERY_OPTIMIZATIONS Requests that the system does not aggressively restrict the app's background activity. This ensures habit reminders are delivered reliably even when the device is in battery-saving mode.

WAKE_LOCK Allows the app to briefly keep the processor awake to ensure a notification is properly delivered and not dropped by the system.

FOREGROUND_SERVICE Used to run a reliable notification delivery service in the foreground when required, ensuring reminders are not missed due to system restrictions.

Log Data

In the event of an error, the app may collect Log Data via third-party tools. This may include your device's IP address, device name, operating system version, app configuration, and timestamps. This data is used solely for debugging purposes.

Service Providers

We may engage third-party companies to facilitate or provide the SERVICE on our behalf. These parties have access to your personal information only to perform specific tasks and are obligated not to use or disclose it for any other purpose.

Security

We strive to use commercially reasonable means to protect your personal information. However, no method of internet transmission or electronic storage is 100% secure, and we cannot guarantee absolute security.

Links to Other Sites

Our SERVICE contains a link to the Google Play Store for the purpose of leaving a review. This link directs you to Google's platform, which is not operated by us. We strongly advise reviewing Google's Privacy Policy. We have no control over and assume no responsibility for the content, privacy policies, or practices of Google Play.

Children's Privacy

Our SERVICE is not directed at children under the age of 13. We do not knowingly collect personal information from children under 13. If you believe your child has provided us with personal information, please contact us and we will promptly delete it.

Changes to This Privacy Policy

We may update this Privacy Policy periodically. Changes will be posted on this page. This policy is effective as of **2026-03-17**.
