

# Post-CMOS Interconnect Performance at Millimeter-Wave Frequencies

Rownak Islam  
Department of Electrical Engineering  
University of Texas at Dallas

*Faculty Advisor:* Prof. Rashaunda Henderson, University of Texas at Dallas  
*Sponsor:* Semiconductor Research Corporation (SRC)

## Abstract

Please use this template when you prepare your abstract for the Student Research Competition Session at the 2025 IEEE Texas Symposium on Wireless and Microwave Circuits and Systems (WMCS). You can ensure compliance with this template by replacing its contents with yours. The abstract is limited to one page. The font is Times New Roman 12 point for the text, and the margins are one inch on all sides. The line spacing is single spaced, and the text should be left and right justified.

If you have any symbols or equations inside the abstract, please use Times New Roman italic font for these. An example would be the equation  $E = mc^2$ . If you include any numerical values in the abstract, please leave one space before the units. An example would be 2.45 GHz. If you have a stand-alone equation in your abstract, please use the following format:

$$v_o(t) = \frac{1}{\pi} \operatorname{Re} \int_0^{\infty} \tilde{v}_i(\omega) T(\omega) e^{j\omega t} d\omega \quad (1)$$

The title is in bold font. After the title, skip one line and then put the name of the student or students who are the co-authors. Then put the name of the department and the name of the institution immediately below the names. Skip one line and then indicate the name of the faculty advisor, following the format shown above. If the project has a sponsor, then put this information on the following line, following the format shown above. Then skip two lines and put the word “Abstract” in bold. Then skip one line and begin the abstract. Please leave one blank line between paragraphs. Do not indent the text at the beginning of the paragraphs.

Please make sure that you save your abstract as a “docx” MS Word file and submit the completed abstract to the Conference Management Toolkit (CMT) by the deadline that is indicated on the symposium website (<https://texassymposium.org/author-toolkit>).

Separate instructions for the preparation of the posters may be found in the Call for Student Research Competition on the symposium website. If you have any questions, please email Student Research Competition Chairs, Prof. Jennifer Kitchen ([kitchen.jennifer@asu.edu](mailto:kitchen.jennifer@asu.edu)) or Dr. Pratik Ghate ([pratik.ghate@formfactor.com](mailto:pratik.ghate@formfactor.com)).

Thank you for your participation in the Student Research Competition at 2025 IEEE Texas Symposium on Wireless and Microwave Circuits and Systems (WMCS).
