

Grade 2 -Social Studies - September-October

Massachusetts Learning Standards Taught in this Unit

1. Explain the kinds of information provided by components of a map (e.g., compass rose/cardinal directions, scale, key/legend, title) and give examples of how maps can show relationships between humans and the environment (e.g., travel, roads, natural resources, agriculture, mining).
3. Construct a map of a familiar location (e.g., the school, the neighborhood, a park).
