

Details about the Prepclass Product

What is prepclass product

Prepclass products consist a web app and a mobile app

what are we trying to achieve with this product

We are building a platform that doubles as an online marketplace and a study site that provides the function of allowing parents request for tutors, view sample tutors, have a profile for themselves, rate and pay tutors. Tutor would have their own back end while there would be an admin backend. The platform would also double as a platform for providing lessons to students, tutors would be allowed to create lessons and upload them while students can study those lessons to improve, ask questions if necessary and request for a tutor if need be

Breakdown product into 3 major objectives

1. Allow learners request for tutors and manage tutoring from their profile page
2. Allow tutors create tutor profiles, where they give details about themselves and get ranked and rated
3. Make it possible for tutors to upload content on a diverse array of topics, while learners go to study the content whenever they need to

Which other products is it similar to

It is in many ways a combination of Upwork and coursera. Wyzant is even more similar as an online marketplace for tutors.

Breakdown into 3 main parts and submain parts

1. learners profile: Tutor request, tutor management & ratings, Payments
2. Tutor profile: Tutor details, tutor schedule, tutor payment, reviews&rating
3. Study: Subjects search, hot lessons, tests, feedback

What features should it have

automatic email responses

automatic sms

search features

rating and review feature
