Abstract (10 pt)

The abstract should convey the significance of your research in a concise and logical manner. An abstract is a synopsis of the research that includes the research problem, research gap, data, methods used to address the problem, results and discussion, and conclusions. The abstract should present only the main points and should be 150-250 words. The abstract should be written in fully justified italics, below the author information.

Corresponding author:
name, email@domain.ac.id

DOI: https://doi.org/10.54732/jeecs.xxxx.x

This is an open access article under the CC–BY license.

Right Margin 2.5 cm

1. Introduction (Cambria, Bold, 11 pt)

Left Margin 2.5 cm

The main text format consists of a flat left-right columns on A4 paper (210 x 297 mm). The margin text from the left, top, right and bottom are 2.5 cm. The manuscript is written in Microsoft Word, single space, Cambria 10 pt and maximum 12 pages, which can be downloaded at the website: https://ejournal.ubhara.ac.id/jeecs/.

A title of article should be the fewest possible words that accurately describe the content of the paper. Omit all waste words such as "*A study of…*", "*Investigations of…*", "*Implementation of…*", "*Observations on…*", "*Effect of…..*", "*Analysis of …*", "Design of…" etc. Indexing and abstracting services depend on the accuracy of the title, extracting from it keywords useful in cross-referencing and computer searching. An improperly titled paper may never reach the audience for which it was intended, so be specific.

The Introduction should provide a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, and the new value of research which it is innovation. It should be understandable to colleagues from a broad range of scientific disciplines. Organization and citation of the bibliography are made in **IEEE style** in sign [1, 2] and so on.

The terms in foreign languages are written italic (italic). The text should be divided into sections, each with a separate heading and numbered consecutively. The section/subsection headings should be typed on a separate line, e.g., **1. Introduction** [3]. Authors are suggested to present their articles in the section structure: **Introduction - Research Methodology - Results and Discussions – Conclusion**.

Literature review should be presented in the section "Introduction". It is used to explain the difference of the manuscript with other papers. The section "Research Method" is used to describe the step of research and used in the section "Results and Discussion" to support the analysis of the results [2]. If the manuscript was written really have high originality, which proposed a new method or algorithm, the additional section after the "Introduction" section and before the "Research Methodology" section can be added to explain briefly the theory and/or the proposed method/algorithm [4].

2. Research Methodology (Cambria, Bold, 11 pt)

Explaining research chronological, including research design, research procedure (in the form of algorithms, Pseudocode or other), how to test and data acquisition [1-3]. The description of the course of research should be supported references, so the explanation can be accepted scientifically [2, 4].

Tables and Figures are presented center, as shown below and cited in the manuscript.

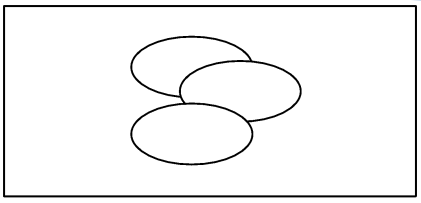

Table 1. The Performance of ...

Variable	Speed (rpm)	Power (kW)
x	10	8.6
y	15	12.4
z	20	14.2

Font Cambria 10 pt

Explanation/description of the images displayed must be appropriate and relevant to the research image

Font Cambria 10pt

Before the image is displayed, there must be a description of the image of at least 4 lines. It is not allowed to display an image without a description.

Figure 1. Description Is Placed Right Below The Figure

3. Results and Discussions (Cambria, Bold, 11 pt)

In this section, it is explained the results of research and at the same time is given the comprehensive discussion. Results can be presented in figures, graphs, tables and others that make the reader understand easily [2, 5]. The discussion can be made in several sub-chapters.

3.1. Sub section 1

Equations should be placed at the center of the line and provided consecutively with equation numbers in parentheses flushed to the right margin, as in (1). The use of Microsoft Equation Editor or Math Type is preferred.

$$E_p = \sum_{i=1}^{c} \frac{n(x_i)}{N} \times p\left(\frac{n(x_i)}{N}\right) \quad (1)$$

All symbols that have not been mentioned in the equation should be explained in the following text.

3.2. Sub section 2

Proper citation of other works should be made to avoid plagiarism. When referring to a reference item, please use the reference number as in [1] or [1, 3, 5, 6] for multiple references. The use of "Ref [5]..." should be employed for any reference citation at the beginning of sentence. For any reference with more than 3 or more authors, only the first author is to be written followed by et al (e.g. in [4]). Examples of reference items of different categories shown in the References section. Each items in the references section should be typed using 9 pt font size.

4. Conclusion (Cambria, Bold, 11 pt)

Present your research conclusions based on the methodology, results, and discussions presented previously. The conclusion should be concise and comprehensive, including all research results. You may also present numerical results as empirical evidence of your findings. Finally, convey the disadvantages of your research or what has not been resolved during the study or future research considered.

CReDiT Author Statement (Cambria, Bold, 11 pt)

All authors are required to declare their contributions to the preparation of the article for JEECS (Journal of Electrical Engineering and Computer Sciences) by following the 14 roles defined in the taksonomi CReDiT. Please assign the appropriate roles to each author based on these 14 categories. Follow the formatting guidelines for author contributions as provided on the JEECS journal website under the CReDiT Author Statement section.

Declaration of Competing Interest (Cambria, Bold, 11 pt)

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.
Authors are required to declare any potential conflicts of interest (whether financial or non-financial) arising from institutions, companies, or individuals with a stake in the research findings. Authors may consult the guidelines on conflicts of interest. (*delete this paragraph when submitting your article*).

Acknowledgement (If needed) (Cambria, Bold, 11 pt)

The author may express acknowledgment to the parties involved in the research, for example, through financial support, facilities, or others. For example, the author would like to thank xxx, who has provided financial support for this research.

References (Cambria, Bold, 11 pt)

For good-quality articles to be published, the editor requires authors to use primary references (journals) with a minimum composition of 80% compared to all other references in the bibliography. Authors are asked to use the most recent references published in the last 5 years. This journal does not use footnotes in the body of the manuscript; all sources of literature follow the rules for writing citations and bibliography.

The citation format in the manuscript and the display of the bibliography in JEECS follows the IEEE numbering format. **IEEE** is a numbered referencing style, where citations are given as numbers in parentheses in the text (e.g. "as shown in [1]"), which correspond to the numbered reference list at the end of the document. Therefore, the reference list is arranged in the order of the works cited in the text, not in alphabetical order. Only one reference is given per reference number. Repeated references to a publication have the same reference number; a source is listed only once in the reference list. More complete instructions for writing references with IEEE can be read on the page IEEE Reference Style Guide for Authors.

All in-text citations must be included in the references, and all references must be acknowledged in the text. Check the bibliography against its in-text citations before submitting the manuscript. It is recommended that the **Mendeley Desktop** application be used for bibliography management.

In-text citations should be in accordance with those listed in the Bibliography. This citation is followed by or ends the sentence or phrase quoted from the source. In the manuscript, cite by mentioning the number according to the order of appearance, for example [1], [2], [3], [4], [5].
