

[User's Manual] How to walk to your car

- Ganaram Inukshuk

-----

1. Walk in a direction normal to the front door and towards the front door, stopping at least one foot away from the door.
2. Place your right hand on the deadbolt handle, rotating in the necessary direction, usually clockwise, to unlock the deadbolt.
3. Move your right hand away from the deadbolt and do the same to the lock on the doorknob itself, if applicable.
4. Step at least three feet away from which way the door opens, and using your right hand, rotate the doorknob while at the same time, pulling on the doorknob so that the door rotates inward.
5. Breathe, you idiot!!!
6. After the door has swept out an angle of at least 70 degrees, stick your right leg out of the door, shifting your body weight towards it.
7. Adjust your position so that you stand erect on your right leg, and then slowly bring out your left leg in the same fashion.
8. After doing this operation once, rotate your body 180 degrees so that you face inside your house. Reach out your right arm to pull in the door knob back into its closed position
9. Insert your right hand into your side pocket and feel around for your house key.
10. Pull out the key with enough force to overcome the forces of static friction, gravity, and loose thread from within your pocket.
11. Locate your house key and aim it towards the keyhole on the deadbolt.
12. Insert the key into the deadbolt and rotate it clockwise. After this, rotate back to its former position and slide the key out.
13. Repeat the same for the doorknob, if applicable.
14. Your door should now be locked. You should be able to tell if you cannot open your door.
15. Rotate your body 180 degrees once more, so that you face towards the outside world. It may be necessary to shield your eyes by placing your right hand in a flat position just above and parallel to the plane of where your eyes are.
16. Repeat the process of progressively moving your right legs and left legs forward (called walking) until you see your car. Breathe and blink, as necessary.
