

Good morning!

This morning I got an idea of an extension activity using your iPads and your field trip to the fire station. Since the students will take a tour, they can use pictures from the field trip to create a movie reselling what they saw and learned. This was made on my iPad using Shadow Puppet Edu. It might be a little challenge to add photos to all the iPads, but I'm willing to help if you take pictures during your field trip. This pictures can be taken on any device (cellphones, iPads, etc). Please let me know if you would like support doing a similar activity!

I'm looking forward to all your field trips to the Suisun City Fire Station. Your tours will be led by my husband, Shaun and a few other firefighters. I will try to be there for all the trips, however, I have a meeting tomorrow morning, so I'll be late to the first trip. If you have any questions, feel free to ask me.

Thanks!
