Outline: Introduction

What excites me

Education-schooling and teaching

AIDA

Conclusion

Characters: Myself and dog

Color Palette:

1d Sample

COOL

1. My Story: Scene 1

Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
Outside scene w/ dog	Hi there! My name is Tracey Fidler and this is my rescue dog named Jaxson, or Jax for short. Not only do I absolutely love this pup, but I also love solving problems. Whether they are simple or complex, it is so rewarding to me to identify a challenge and discover solutions. But first, a little bit about my background.	Character is sitting outside (outside background sounds) relaxing with some tea. Dog walks onto screen, character stands and waves to introduce herself (camera focus). Sits and introduces her dog, and tells what she enjoys most about working with clients. Thought bubble with animated hearts.	

2. Scene 2

Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
School setting	I have been a learner for as long as I can remember. It was no surprise to my family or friends that I became an educator. I truly relished taking complicated concepts and breaking them down so that my learners could more easily grasp them.	Transition to school setting, split horizontal to show change of setting. Several students, main character at front of the room (school background sounds). Character points, and shows excitement (camera focus).	

3. Scene 3

	decided to pivot my career path so I joined! It was through the Applied Instructional Design Academy that I realized that I already had many of the unique responsibilities and areas of expertise needed to become an exceptional instructional designer. I already knew how to design well-structured educational programs that aligned with learning objectives for a specific audience, as well as develop engaging instructional and multimedia materials. On a daily basis, I had been assessing learners to identify knowledge gaps and areas for improvement. And of course, I analyzed data to make data-driven decisions, and designed assessments and evaluations to measure the effectiveness of my instructional strategies.	talks timed to a speech bubble of a checklist for: “Design & Develop” “Identify Gaps & Needs” “Data-Driven & Assess”

Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
Home office setting with dog	And don't forget Mom, you're an effective communicator, collaborator, and time-manager. You also step up to lead, but are sure to be empathetic and understanding as you create a supportive and inclusive environment. And finally, you're always adaptable, especially to meet diverse learners- like me!	Animated dog is talking while character stands blowing kisses and hearts.	

8. Scene 6 (continued)			
Visuals/Graphic	Script/Audio	Programming/Animation Notes	Comments
Home office setting with dog	Thanks buddy! You are the best! After completing Applied Instructional Design Academy, which enabled me to expand my knowledge on adult learning theories and upskilling my tech skills to include getting a variety of credentials including: Articulate Storyline	Character sits at desk next to clock spinning to show time passing, transition- iris center. In place of the clock is now a framed AIDA certificate.
