Abstract

This paper provides a template for preparing papers for electronic production of the Journal. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety. The Abstract should be informative and completely self-explanatory, provide a clear statement of the problem, the proposed approach or solution, and point out major findings, and conclusions. The Abstract should be 100 to 170 words in length. The abstract should be written in the past tense. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. The keyword list provides the opportunity to add keywords, used by the indexing and abstracting services, in addition to those already present in the title. Judicious use of keywords may increase the ease with which interested parties can locate article.

Article Type

Articles are original research articles or the results of reviews of previous articles. Articles can be written in Indonesian or English. The number of article pages is between 10 – 20 pages including a list of references. The systematics of writing research articles consists of title, author's name, institution and correspondence address, abstract, keywords, abstract (eng), keywords (eng), introduction, method, results and discussion, conclusions and suggestions, acknowledgments and list of references.

The systematics of writing a conceptual article (containing the results of a review) consists of the title, author's name, institution and correspondence address, abstract, keywords, abstract (eng), keywords (eng), introduction, main section, summary, and list of references. The title of the article is written using Bookman Old Style font size 16, capitalized, bold, centered, consists of a maximum of 17 words and describes the contents of the manuscript.

The author's name is written using Bookman Old Style font size 12 without a title, the author's name is written in full without abbreviations. Author names from different agencies/university are marked using superscript after the name. Manuscripts are presented in a narrative manner (without numbering in front of the subtitles). Formulas are written separately not in sentences and are numbered on the right. The formula is written using Microsoft Equation.

$$x + y = 2 \qquad (1)$$

The image is inserted in the text box and the figure caption is placed under the image. Image captions are numbered and images must be referenced in the text. Image captions begin with a capital letter. Image captions that are more than one line are written using space 1. The image is painted with a line width of 1 pt and should have good contrast quality, can be seen in Figure 1. There should be sufficient space between the figure and the text above and below it.

HEADING I

Heading II

Heading III

Heading IV

Avoid confusing heading levels. It is inappropriate to follow a heading 1 with a heading 3.

METHOD

Contains how data is collected, data sources, data collection tools, how to ensure data validity, and how to analyze data.

RESULTS AND DISCUSSION

Results

Results are the main part of scientific articles, containing clean results without data analysis process and results of hypothesis testing. The results can be presented with tables or graphs. The content of the discussion are: Answering research problems, interpreting findings, integrating findings from research into existing knowledge sets and developing new theories or modifying existing theories.

Discussion

The table is created with a line width of 1 pt and a table caption is placed above the table. Table descriptions that consist of more than 2 lines are written using 1 space. Table lines are prioritized only for horizontal lines while vertical lines are omitted. Can be seen in Table 1.
