SL - 8hrs Screen Time = \$10k/Month?

Hey %FIRSTNAME%

Your phone is a double-edged sword.

You can either use it as a crutch

Or turn it into a powerful tool for making money.

**Let me show you how to turn your phone from a distraction
To a money multiplier**

You need to first understand that
The economy we live in now is based on attention

If you can find a way to garner attention

There are always ways to monetize that attention

The Kardashians have no reason to be as rich as they are

Yet they became billionaires through the attention economy

Well what kind of business can you start with just your phone?

Affiliate marketing... but not affiliate marketing how you know it

Normally for affiliate marketing to work you would have to spend hours on growing an audience

Creating a brand and then promoting an average product

Instead I have a new way for you to use affiliate marketing called **“hybrid commerce”**

Which is essentially by reposting viral clips - so you never have to make anything of your own

Then using the views you get and monetizing them through

1. Affiliate marketing
2. But also other ways like, AdSense, creating your own digital product, etc

If you need guidance and a step by step plan You can get help by booking a free call here with my head coach Miguel

[link]

We are not gonna able to give all these free calls forever, so if there's still a slot you can book, I would go ahead and book it now rather than later

But why Hybrid commerce?

A Lot of people seem to think you need a ton of money to start a business

But you really don't, especially on the internet

You can start an online business with very little, or no money at all

For Hybrid Commerce, You do not require any start up cost, don't have to show your face or spend money on product or ads

All you need is a phone and an internet connection

This is the basic plan:

Post viral faceless content -> Get views -> Earn Adsense -> Get link clicks on affiliate program -> Earn \$1000-\$3000 commissions

This way you can start earning cash without having to spend an insane amount of money or time.

If you want to learn more

Email 2:

SL - 1M followers or 10M dollars

Most people would jump at \$10M.

But here's what you don't realise:

The most valuable currency in the world

Is the currency of Human Attention

With 1M followers, if you know how to leverage it, you can easily surpass \$10M in earnings.

But that's the key—**knowing how**

How to get attention on social media and then monetizing your audience

So Let me ask you this:

How many hours a day are YOU on a social media app?

Do you think the number will go up or down globally over the next 15 years?

Social Media isn't going away.

Social Media is GROWING.

Do you believe the % of businesses in the world that rely on social media is shrinking or growing?

They USE Social Media, instead of having Social Media use them.

But everyone knows how to build an audience or monetize it effectively. That's where we come in.

I'm giving you a unique opportunity to speak with my head coach, Miguel.

He's helped countless others grow and monetize their audiences successfully.

Here are some of the results:

Alan Lim - Doing 91k+ p/m (with 90% profit margins and automated!)

Mathieu - Doing \$40k+ p/m (same margins ;))

Want to learn how?

Book a free call with Miguel now.

We can't offer these free calls forever, so if you see an available slot, grab it before it's gone.
[**Book Your Free Call Here**]

(here I wasnt sure what else to say, I'm struggling to come up with ideas)

What % of the average person's life is spent on social media?

Genuinely, ask yourself the answer to that question.

How many hours a day are YOU on a social media app?

Do you think the number will go up or down globally over the next 15 years?

Invest in GROWING industries not dying ones. We track trends, spot where the world is going, then equip our students to exploit the trend for decades to come.

Social Media isn't going away.

Social Media is GROWING.

Do you believe the % of businesses in the world that rely on social media is shrinking or growing?

Those who USE Social Media, instead of having Social Media use them.
