**The [Main] Title Of The Paper, 12 Pt Font-Size, All In Bold**

(The title of the article should be clear (not ambiguous) and identifying the content. The format of the title uses Times New Roman 12 Bold, Centered Alignment, and must be Sentence case.

**First Author <sup>1\*</sup>, Second Author <sup>2</sup>, Last Author <sup>3</sup>**

(Without honorary name or degree and should be written in full name)

*The affiliation is written in full name (not abbreviation) just as the example below:*

<sup>123</sup> Department of Islamic Economics, Faculty of Economics and Business, Universitas Yudharta Pasuruan, Indonesia.  
email1@gmail.com, email2@gmail.com, email3@gmail.com

---

**ABSTRACT**

**Introduction:** The abstract comes after the title page in the manuscript. Abstract must be integrated and independent which consist of introduction and clearly stated the purpose of research

**Methods:** Example, this research is a quantitative study that applies the Johansen Integration Test and Vector Error Correction Model to see the long-term impact and shock response on certain variables.

**Results:** Report the main outcome(s)/findings including (where relevant) levels of statistical. Example, the findings indicate the existence of short-term and long-term causality between macroeconomic variables and the Indonesian Islamic stock index. Especially in the long run, industrial production index and inflation have a significant effect on ISSI, while the exchange rate, interest rates and SBIS have no significant effect on ISSI

**Conclusion and suggestion:** Should relate to the study aims and hypotheses. However, the abstract should be written as a single paragraph without these headers. For this reason, references should be avoided. Also, non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. Abstract must be written using 150 until 250 words which have no reference and accompanying keywords. (Times New Roman 10, justify, 1 spacing).

**Keyword:** The keywords should be avoiding general and plural terms and multiple concepts. Keywords should not be more than 5 words.

---

**Paper type:** Research paper

**A. INTRODUCTION**

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Explain how you addressed the problem and clearly state the aims of your study. It is mandatory to have primary references that are indexed by Scopus or/and Web of Science. At least 50% of references need to be explained briefly and highlight the research gap. It is recommended if the author (s) have several layers of research gap, which can help the authenticity of the paper. Author (s) also need to compose the introduction, think of readers who are not experts in this field. Please describe in narrative format and not using sub-chapter. (Times New Roman, 12, 1.15 Spacing, Justify)

## B. THEORETICAL STUDY

There are three points that will be discussed in literature review: the basic theory, previous study and hypothesis from previous study.

**Traditional society** In Rostow's development theories, the traditional society has economic activities by traditional methods, whether in production, distribution, and consumption activities. In Rostow's point of view.

**Previous Study and Hypothesis**, preconditions for take-off In this phase, Rostow sees the society in transition phase, society optimizes themselves to strengthen and improve their economics. (Times New Roman, 12, Justify)

## C. METHODOLOGY

Explain in detail about the research design, settings, time frame, variables, population, samples, sampling, instruments, data analysis, **reason for choosing the method**, and information of ethical clearance fit test. Editorial team does not recommend a short one paragraph research method.

"...The method of this paper is the library method, library method is the method that emphasizes the use of literature as the primary data source (Malik, et. al., 2011)..."

"...This research is a quantitative study that applies the Johansen Integration Test and Vector Error Correction Model to see the long-term impact and shock response on certain variables (Malik, et. al., 2011)..."

**The author (s) must mention the research method based on the references indexed by Scopus or/and Web of Science with high citation index, this is to ensure the method is appropriate to be applied for doing research and minimizing biasian results.** (Times New Roman, 12, Justify)

Formulas using equation

$$Rt = \ln \ln (Pt - Pt - 1) + \frac{\alpha}{\beta} \dots\dots\dots (2)$$

## D. RESULT

Results should be presented continuously starting from the main result until supporting results. Unit of measurement used should follow the prevailing international system. It also allowed us to present diagrams, tables, pictures, and graphics followed by narration of them. **Author (s) must put the descriptive statistic for quantitative research and explain briefly about the table. It is also recommended for the author (s) to put a robustness test at the last section.**

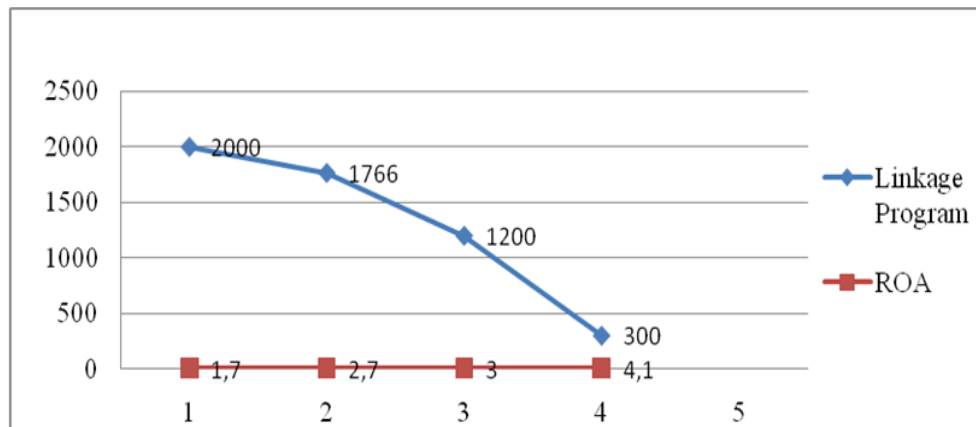

Figures, tables, and diagram should be **editable** ones, table don't using picture

Table 1 (Center, Times New Roman 10)

No.	Staple Food Ingredients	Consumption per capita (kg / capita)		
		2022	2023	2024
1.	Rice	83,24	80,56	81,52
2.	Corn	75,68	53,82	50,37
3.	Wheat	44,96	43,60	35,49

Consumption on Ramadhan (Center, Times New Roman 10)

 Figure 1. Times New Roman, 10, Single Spacing, center, Bold Capitalize Each Word)

## E. DISCUSSION

Describe the significance of your findings. The novelty of research finding should be emphasized and have deep drive explanations from the author (s), consider the most important part of the paper. Avoid being verbose or repetitive content, be concise and make your points clearly. Follow a logical stream of thought; in general, interpret and discuss the significance of your findings in the same sequence you described them in your results section. Use the present verb tense, especially for established facts; however, refer to specific works or prior studies in the past tense. If needed, use subheadings to help organize your discussion or to categorize your interpretations into themes. The content of the discussion section includes: the explanation of results, references to previous research, deduction, and hypothesis. (Time New Roman, 12, Justify)

## F. CONCLUSION

Conclusion should be explained clearly related to hypothesis and new findings in one paragraph. In this part, the author (s) also must cover the implications from several perspectives (policy makers, society, firms/institutions, or any other parties that might be influenced from the research findings). Research limitation and future study might be added at the last sentences. Any conclusions with pointer style should be avoided by author (s). (Times New Roman, 12)

The **acknowledgment** explains additional information, such as gratitude to parties that helped during the research process outside the co-authors list. Authors must state their **contribution** through research, including research ideas, literature management, data management, analysis, finding, research funding, editing, and writing process. **Funding**, mention the grant document number if the research got financial support. If there is no funding for the research, the author still needs to clarify.

## REFERENCES

The author-year notation system is required and completed. All references mentioned should be written down in reference using APA 6th Edition style and arranged from A to Z. Articles have minimal 35 recent references (last 10 years) and 80% is journal. 50% of the article references must be indexed under Scopus or/and Web of Science. Any old article is able to be used by authors (s) if it's the basis theory of research with a high citation index. All cited references must be mentioned in in-text citation. If you are Mendeley user, please download the reference style here
