

Privacy Policy for AI Try-On Clothes

Effective Date: June 13, 2026

1. Information We Collect

- **User Photos:** We collect the photos you explicitly upload (e.g., front profile, full body) to generate the virtual try-on experience. These photos are securely stored locally on your device's browser storage.
- **Website Content:** The extension temporarily reads the product image and title from the active shopping website you are viewing (like Amazon or Flipkart) when you click the "Try On" button.

2. How We Use Your Information

- Your uploaded photos and the product images are temporarily sent to secure, third-party AI image generation APIs (such as Hugging Face Spaces) strictly for the purpose of creating your virtual try-on result.
- We do not use your data for advertising, tracking, or profiling.

3. Data Sharing and Disclosure

- We do not sell, rent, or trade your personal data or photos to any third parties.
- Your data is only transferred to the AI service provider to fulfill the core functionality of the extension and is not persistently stored on our servers.

4. Data Retention

- Your uploaded photos and try-on history remain locally on your device. You can delete them at any time from the extension's dashboard.

5. Contact Us If you have any questions about this Privacy Policy, please contact the developer via the Chrome Web Store support tab.
