

Connect the OPS to the Internet

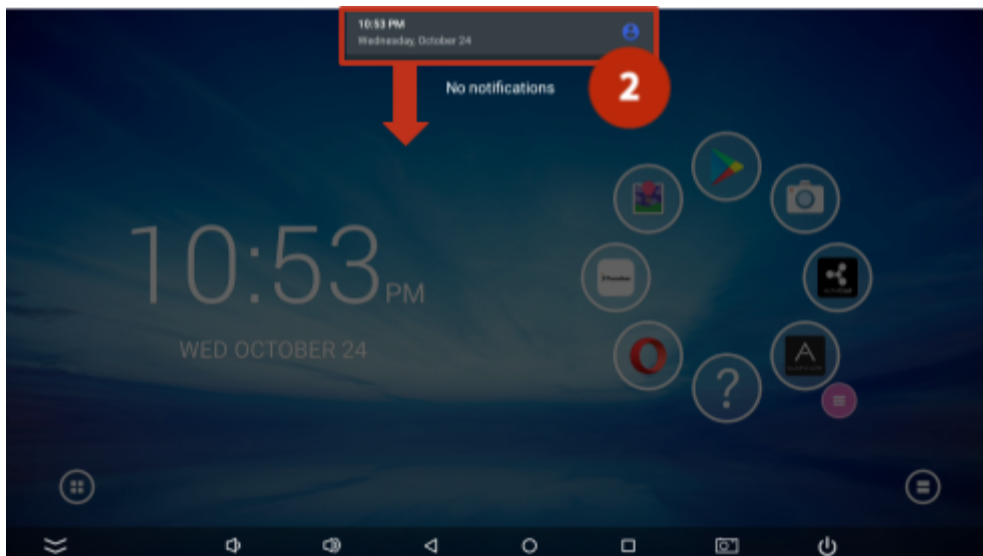

Versions 4.5, iSeries, 6

Just like a Smartphone or tablet, your panel is most functional when it's connected to the Internet. Follow these instructions to get connected.

1. Swipe down from the top of the screen (anywhere).

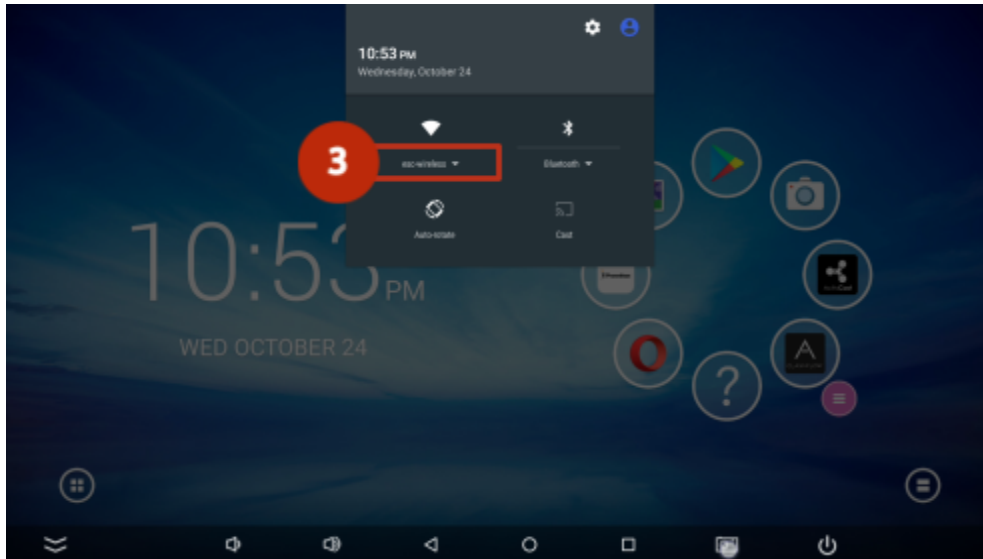

2. You'll see this pull down menu. Swipe down again.

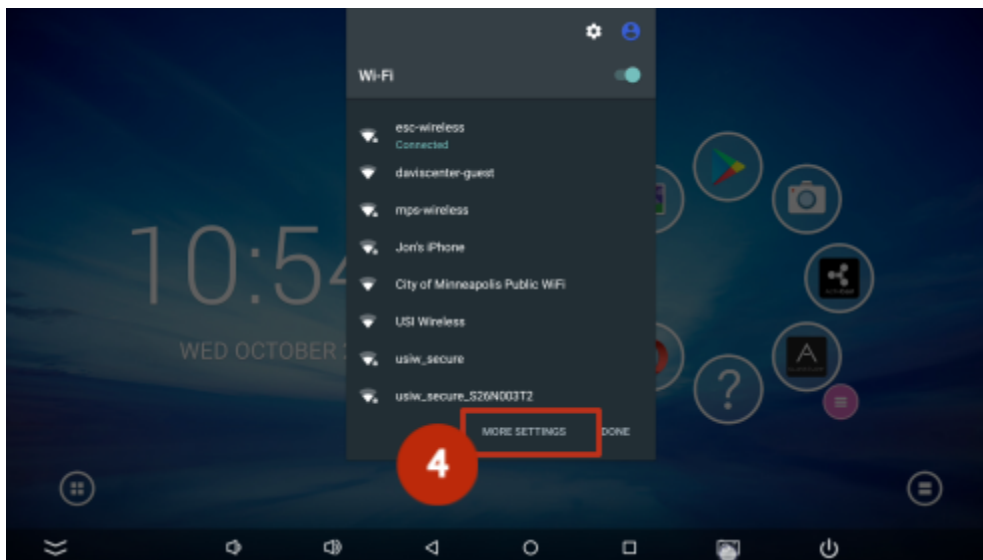

3. You'll see the WIFI settings. Tap the **name of the network**.

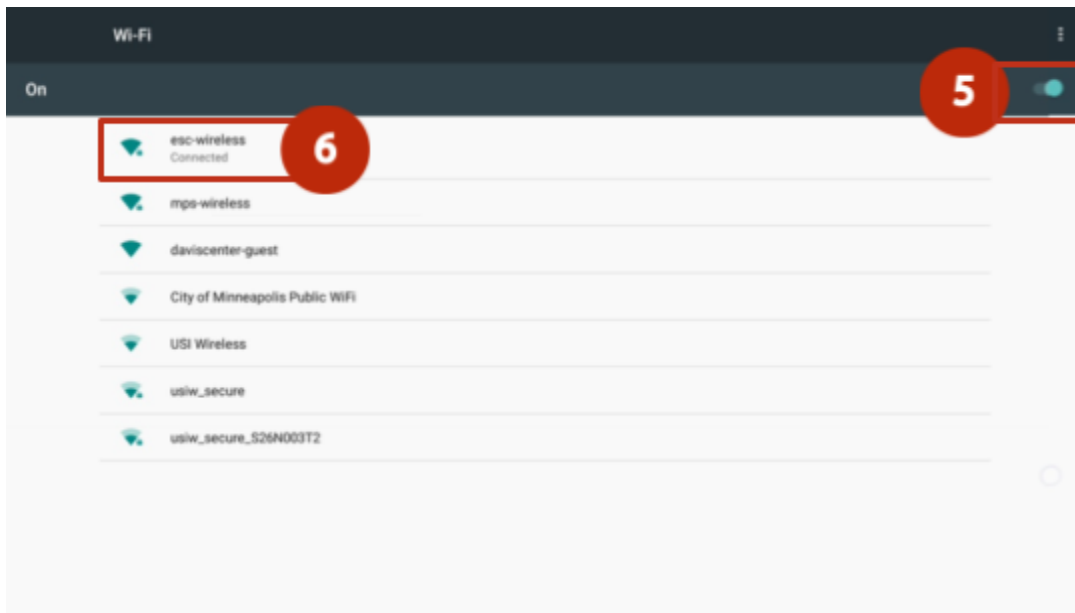

4. Tap **More Settings**.

5. Be sure your WIFI is **turned ON** using the toggle.

6. Tap the **network** you would like to connect to.

7. Type the WIFI **Password here** using the floating keyboard.
8. Tap either **Green Go arrow** on the keyboard or **CONNECT**.
