

Heartcatch Alt Shiny List

The pokemon below are all ones whose shinies are too close to their original designs to count as an actual shiny. ***You are allowed to use the canon shiny colorations for these pokemon as common myo designs.*** They just will not be considered shiny. All pokemon in this list are required to be an “Alternate Shiny” Palette

IE: Go wild with the design!

All canon shinies linked here: [Hover over a pokemon to see the non-shiny version.](#)

If you think a pokemon is missed or should be added/removed, please toss your suggestion into the #suggestions chat in the discord server!

***** Use control + F to search for a pokemon name *****

***** Some pokemon will have additional info that you must abide by: For example, check ivysaur and venusaur *****
