As road conditions deteriorate, we will be informing you if we need to use our emergency bus routes. These emergency bus routes will only go into effect when you hear them announced via Infinite Campus and AGWSR official social media outlets. Parents should attempt to meet their children's bus with the most direct route to a hard surface roadway. Your child may ride on a different bus on "hard surface only" days. Look at the hard surface routes and see which bus comes the closest to your house. If you live on a hard surface, the bus will stop at your house. You will be contacted by the bus driver on what time he will be stopping at designated stops. Parents should be at their morning/afternoon pick up/drop off site early the first day to establish a normal pick up/drop off time for their student. We will not drop off the students if nobody is there to pick them up. The bus will wait at the stop for approximately 2 minutes. Students not picked up will be brought back to the normal departure building for parents to pick up. When we go to "hard surface only" routes, it will be for both the AM and PM routes for that day.
