- **Capacity:** Approximately 20 students per session.

Ready to Sign Up?
To enroll your child in one or more sessions, please complete the registration form below.
Please note that this program is dependent on student interest and participation and may be adjusted as needed. LUTZ Extended Day Sign-Up

Questions? Please contact Coventry Grammar School at **(860) 742-7313**.
We are excited to offer this additional enrichment opportunity to our students! Please see program descriptions below for more information!!

December 11th	**January 15th**	**February 12th**
Tales from the Trails What are animals up to in the wild? Using all our skills as naturalists, students will embark on an indoor simulated trail walk, exploring replica animal tracks, fur, skulls, and scat to uncover clues about how animals live and interact. Who survives? What do they eat? After the guided walk, students will mold their own animal track and piece together their discoveries to tell the story of each animal's daily activities.	Critter Classification - Fur, Feathers, and Scales Do mammals, birds, and reptiles share similar physical features, and how do we tell them apart? Our educators will travel to your classroom with three live animals, one from each group, along with biofacts from the museum's natural history collection. Younger students will demonstrate understanding of the different groups with a craft, while older students will play a team based game to demonstrate understanding.	Wildlife Illustration Animals have some amazing and unique ways of adapting to their environments, so they grow, survive, and thrive. In Wildlife Illustration, students become both scientists and artists as they explore the world of animal adaptations. Using their observation skills, they will study biofacts from the museum's natural history collection and meet a live animal ambassador up close! Younger students will create colorful mosaic art inspired by wildlife and the older students will learn drawing techniques to illustrate their own imaginative animal with fantastical adaptations. This class blends creativity and science into a wildly artistic adventure.
