

After your Google Classroom is set up you want to make sure Google Meet is visible to students. This way students can simply select the join button and participate in the Google Meet. If you see the following image below this means your students are not able to join your Google Meet.

To fix this do the following

1. In your Google classroom select the Gear icon in the right hand corner

2. Once you select the gear icon scroll down to manage meet section. Turn on the Visible to Students button.

Visible to students

- After this step is complete your students can join the Google Meet.
