- **13.15-14.30. Research Consortium Lab:** Designing Future Projects on Multilingual Disinformation

For expressions of interest to participate, contact iker.erdocia@dcu.ie by 23rd June

About the project: MULTIDISIN is an interdisciplinary project funded by **Research Ireland's** New Foundations programme and supported by [DCU FuJo Institute](#) and [ADAPT Centre](#). It aims to mitigate the harmful societal impacts of the digital transition by **understanding and countering dis/misinformation from a comparative perspective, with a particular focus on minority languages**. Bringing together linguists, computer scientists, journalists and other stakeholders, the project creates a space for dialogue and collaboration. Its goal is **to build a strong international network** and develop inclusive, multilingual strategies and tools for detecting, analysing and countering dis/misinformation across diverse linguistic and cultural contexts. A Webinar Series took place in May 2026. Some webinars are available [here](#).
