

Blue company

SL: Instagram credibility

Hello,

While researching wristwatch markets, I found your website as an intersection of multiple brands, and it seems like its Instagram page has fewer followers than the retailers have (less than 4K). Developing the newsletter by implementing funnels will increase the number of followers on your Instagram page; as well as the traffic on your website. Maximizing attention toward your business will increase the credibility of your company. If you are interested in hearing more about it, let me know in the reply.

Best regards,
Somaye
