line 3: name of organization (of Affiliation)

line 4: City, Country

line 5: email address

Abstract—please write in English. This document gives formatting instructions for authors preparing papers for publication in the IJCIS. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and as a template into which you can type your own text. Abstract should be no longer than 250 words. It gives a brief summary of the content of the paper and point out the main objective, the methods employed, the results obtained and major conclusions.

Keywords : Include 3 – 5 keywords or phrases, keywords are separated by a comma.

I. INTRODUCTION

Please write in English, The INTRODUCTION section discusses the background of the problem, a brief literature review, the aims and objectives of the research.

II. RESEARCH METHODS

This section contains related research and a detailed description of the stages of the research conducted.

III. RESULT AND ANALYSIS

The results of the study should be written clearly and concisely. The discussion should describe the importance of the results of the study, not repeat it.

3.1 Writing Format

The size of the paper must match the A4 page size, width : 21cm and height : 29.7cm. Margin limits are set as follows.

- Top = 2cm
- Left = 2cm
- Bottom = 1.5cm
- Right = 1.5cm

Writing articles must be in two-column format with a space of 1.0 between columns, Before and After = 0. Paragraphs must be organized. All paragraphs must be level. That is, both left aligned and right aligned.

3.2 Number of Page

The number of pages of papers submitted is between 6 and 12 pages.

3.3 Document Letters

All documents must be in Times New Roman. Other font types can be used if needed for special purposes.

3.4 Title and Author

The title must be in the Regular type 18 pt font. Author's name must be in Regular 11 pt font. Author affiliation must be in Italic 10 pt. Email address must be at 9 pt Regular font.

The title and author must be in a single column format and must be centered. Every beginning of a word in the title must be uppercase except for short words like, "a", "and", "in", "by", "for", "from", "on", "or", and the like.

The author's writings may not indicate the name of the position (for example Supervisor), any academic degree (for example Ph.D) or membership of any professional organization (for example, Senior Member of the IEEE).

So as not to confuse, the family name is written in the last part of each author's name (for example John AK Smith). Each affiliation must include, at a minimum, the name of the company and the name of the city / district in which the author is based (eg. ITB AAS Surakarta).

An e-mail address is required for the corresponding author. Information as the author

of the correspondence is written after the email address, For a maximum reference of the last 5 years.

3.5 Heading Section

There should be no more than 3 levels for headings. All headings must be in the 10pt font. Every word in a heading must be capitalized, except for short words as listed in Part III-B.

1) 1) *Heading Level 1: Heading level 1 must be in Small Caps, located in the middle and use uppercase Roman numeric numbers. For example, see the heading "III. Page Style" of this document. Heading level 1 that cannot use numbering are "Thank You" and "References"*

2) 2) *Heading Level-2: Heading level 2 must be italic, close to the left and numbered using capital letters. For example, see the heading "C. The heading" section above.Heading Level-3:*

3) 3) *Heading level-3 must be spaced, italic, and numbered with Arabic numerals followed by right parentheses. Heading level 3 must end with a colon. The contents of the level 3 section follow the heading titles with the same paragraph. For example, this section begins with heading level 3.*

3.6 Chart and Table

Charts and tables must be centered. Large graphs and tables can be stretched on both columns. Any table or figure that covers a width of more than 1 column must be positioned at the top or bottom of the page.

Graphics are allowed in color. All colors will be saved on the CDROM. Images may not use dotted patterns because there is a possibility that they cannot be printed in the original. Use contrasting solid coloring both for display on a computer screen, as well as for prints in black and white, as shown in Figure 1.

Figure 2 shows an example of an image with a low resolution that is less appropriate, whereas Fig. 3 shows an example of an image with adequate resolution. Check that the image resolution is sufficient to reveal important details in the image.

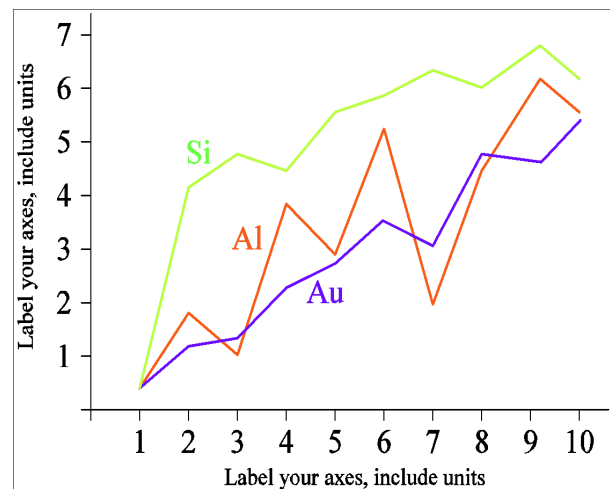

Figure 1. Examples of line graphics using contrasting colors both on a computer screen, and in black and white prints.

Please check all images in your journal, both on screen and printed versions. When checking the printed version of the image, make sure that:

- colors have sufficient contrast,
- the figure is quite clear,
- all labels on the image can be read.

3.7 Image Caption

Images are numbered using Arabic numerals. Captions must be in 8 pt. The one-line image captions (for example Figure 1) are centered, while the multi-line captions must be aligned left and right (eg Figure 1). The image caption with the image number must be placed after the image is related, as shown in Figure 1.

3.8 Table Caption

Tables are numbered using uppercase roman numerals. Note the table in the center (centered) and in regular font size of 8 pt with small capital letters. Each word in the table description uses capital letters, except for short words as listed in sections III-B. The table number captions are placed before the linked table, as shown in Table 1.

Table 1. The Plotting of Training and Testing Data in Each Fold

No	Training Data	Testing Data
1	178-236	1-59
2	1-59 and 119-236	60-117

3	1-118 and 178-238	119-177
4	1-177	178-236

3.9 Page Number, Header and Footer

Page numbers, headers and footers are not used.

3.10 Links dan Bookmark

All hypertext links and bookmark sections will be deleted. If the paper needs to refer to the email address or URL in the article, the address or full URL must be typed in a normal font.

3.11 Writing Equations

Sequential equations are followed by numbering in parentheses with right-aligned margins, as in (1). Use the equation editor to create equations. Tab spaces and write the equation number in parentheses. To make your equation more tight, use a slash (/), a rank function, or an exact rank. Use parentheses to avoid confusion in giving a fractional number. Explain the equation while in the part of the sentence, as follows :

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)]$$

$$\int_0^\infty \exp(-\lambda |z_j - z_i|) \lambda^{-1} J_1(\lambda r_2) J_0(\lambda r_i) d\lambda . \quad \dots(1)$$

Make sure that the symbols in the equation are defined before the equation or immediately follows after the equation appears. Symbols are typed in italics (T refers to temperature, but T is a Tesla unit). Refers to "(1)", not "Press. (1) "or" equation (1) ", except at the beginning of the sentence: " Equation (1) is ..".

Figure 2. Example images with less resolution

Figure 3. Example images with sufficient resolution

REFERENSI

The headings in the References section may not be numbered. All reference items are 8 pt in font size. Please use italic and ordinary style to distinguish basic differences as shown in the References section. Numbering of reference items is typed sequentially in square brackets (for example [1]).

When you are referring to reference items, please use reference numbers only, for example [2]. Do not use "Ref. [3]" or "Reference [3]", except at the beginning of a sentence, for example "Reference [3] indicates that ...". In the use of several references each number is typed in separate brackets (for example [2], [3], [4] - [6]). Some examples of reference items with different categories are displayed in the References section which includes: contoh buku pada [1]

- sample book series in [2]
- examples of journal articles in [3]
- sample paper seminar at [4]
- patent examples in [5]
- example website at [6]
- an example of a web page at [7]
- example of a databook manual in [8]
- example datasheet in [9]
- an example of a master's thesis at [10]
- examples of technical reports in [11]
- standard examples in [12]

VI. CONCLUSION

This template is the first version. Most of the format instructions in this document have been adapted from templates for articles IEEE.

THANK-YOU NOTE

Titles for thanks and references are not numbered. Thank you to the IJCIS Team for taking the time to create this template.

REFERENCES

Writing scripts and citations referred to in this manuscript are recommended using reference applications (reference managers) such as Mendeley, Zotero, Reffwork, End notes and others. [Times New Roman, 12, normal], IEEE style
