REVISED:

School Sponsored Athletic Programs

The School Board recognizes the value of athletic participation to the development of well-rounded students. Significant evidence exists to show that students who participate in extracurricular activities often perform better academically than those who do not. The School Board promotes athletic participation in the belief that successful athletic programs promote individual and team potential by helping to develop high standards of competence, character, civility and citizenship for student-athletes. The School Board recognizes that in addition to promoting the physical and social well-being of participating students, athletic programs offered can be a potent factor in both establishing a positive school climate and nurturing strong community-school bonds.

It is the Board's policy, therefore, to provide opportunities for interscholastic athletic competition in a variety of sports as budgetary considerations allow. Such opportunities should encourage participation by as many students as reasonably possible and should be carried on with the best interests of the participants as the first consideration.

All district sponsored athletic programs shall require the approval of the School Board, and shall be administered by the Athletic Coordinator, subject to the supervision of the Principal. Different programs that the Board may from time-to-time approve, can include fully sponsored school teams, club teams, and/or intramural teams. Competitions offered as part of otherwise approved instructional programs do not require specific Board approval.

Qualified personnel should be provided for coaching and supervising all athletic programs.

Participation in interscholastic athletics is subject to Board policies (e.g., JJA, JJIC, JJJ, etc.), and any rules adopted by the Superintendent, the Athletic Coordinator, the Principal, or a team coach.
