DOCS WITH EVERYTHING inside:

WWP - Streamline Choices

BEST MARKET RESEARCH TEMPLATE - STreamline Choices

TPA - Cox

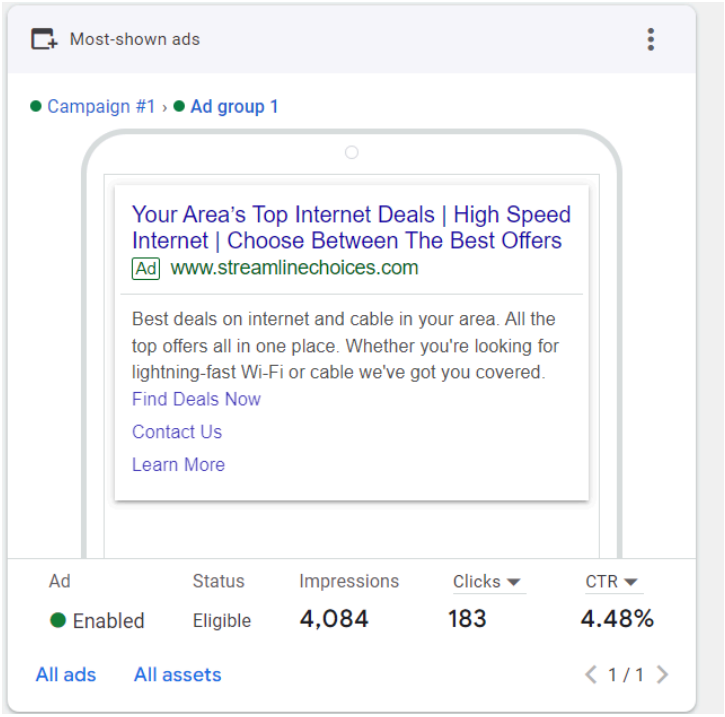
Important things to note:

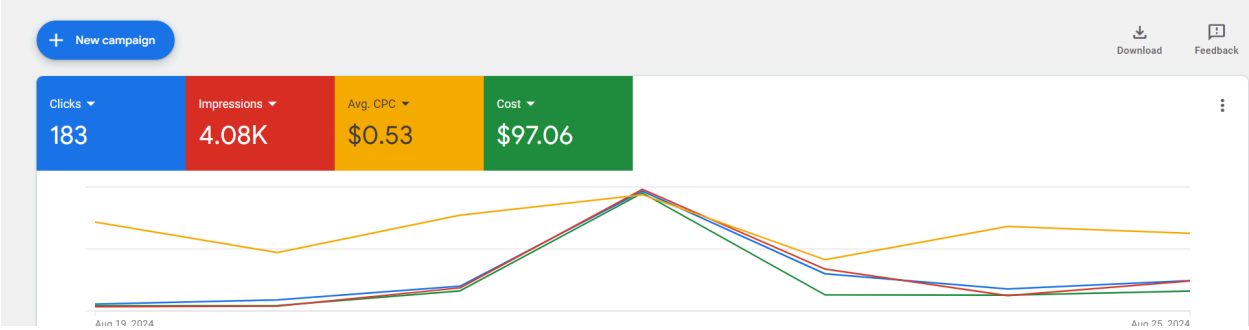
- Client is an ambassador for a broker that has partnered up with most of the top providers of internet, cable, and cell phone plans
- They aren't attached to a single provider so they will find you the best deals in your area and actually save you money and give the best value
- The call center has over a 50% conversion rate
    - They automatically find the best deals for you where you live and give you the best ones, they serve as a broker to those providers
- Client gets $100 per conversion
- Since no one else in the affiliate marketing program has done affiliate marketing before, they expect you to get leads by talking to people irl and this I need help with
- Can't track what happens once they get on the form
    - I found out the broker does have trackers on the form, multiple actually, so I believe my client can just ask at the meeting about any trackers nicely
    - If not I have no idea how I can aikido this, making my own form on my site then it auto filling out the form on the next page once clicking enter and taking you to the scheduling a call part automatically just came into mind as I typed this

Landing page: streamlinechoices.com

Was told I could not relate anything to the original program

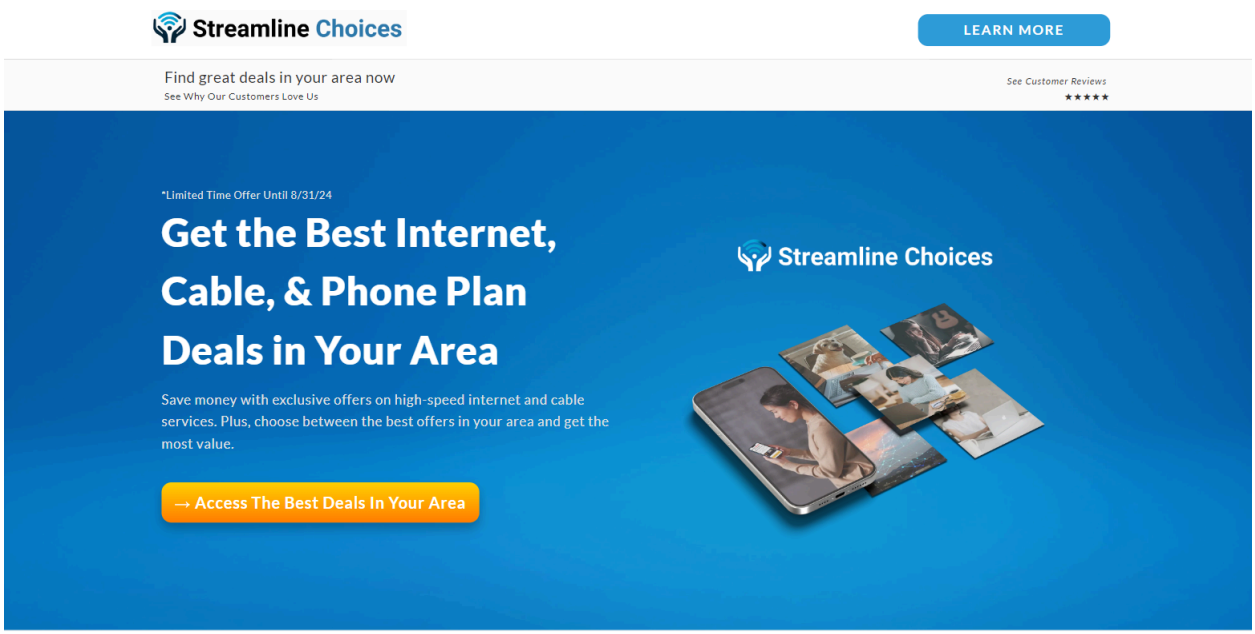
ADS





↓

Landing Page



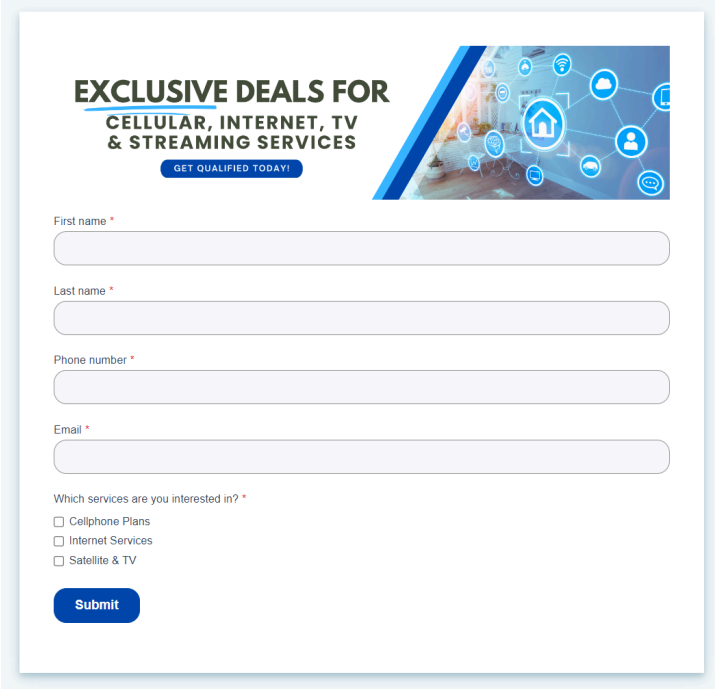
streamlinechoices.com

- All of the buttons and redirects on the page lead to the same thing (the form) fyi

This is also where my tracking stops and I can no longer see what happens after they go to the next step with how I currently have this all set up.

↓

Form



So this is the form provided to my client by the people who run this whole affiliate marketing thing looks like this, takes you to a completely different url

Once you fill it out you get sent to calendly where you schedule a call with the call center and that's it

↓

Call

The call center converts over 50% of callers
