

Morpheus 8

As we age, our skin loses elasticity, with wrinkles, lines, and sagging appearing over time. This can make us appear older than we'd like.

Morpheus8 is a microneedling device that utilizes radiofrequency energy to remodel and contour the face and body via subdermal adipose remodeling. This fractional treatment penetrates deep into the skin and fat for a smoother and sleeker appearance.

By targeting the deeper layers of the skin, the building blocks will reorganize themselves in a natural anti-aging process. There is little to no damage to the dermis, and this procedure provides an extremely uniform effect.

Morpheus8 is an excellent alternative for people who want to improve their appearance without undergoing a surgical procedure.

What is MORPHEUS8?

Morpheus8 is a minimally invasive Subdermal Adipose Remodeling Device (SARD) that uses RF (radio frequency) to remodel the collagen and coagulate adipose tissue. This interchangeable portfolio of microneedling tips, with different pin configurations (Prime 12 pin, Resurfacing 24 pin, Morpheus8 24 pin), provides physicians with a modular solution to deliver customizable full-body fractional treatments.

What are the Key Benefits:

- Morpheus8 delivers the deepest fractional treatments available, penetrating subdermal tissue up to 8mm (7mm + 1mm thermal profile).
- Dual Handpieces allow for increased treatment functionality: Morpheus8 for smaller treatment areas and Morpheus8 Body for larger and deeper tissue treatments.
- Intelligent programmable technology and large, easy-to-navigate LCD treatment screen

What areas Can the Morpheus8 Treat?

- Face & Body
Morpheus8 targets subdermal layers of the skin and tissue to remodel collagen on the face and body.
- Collagen
This fractional tissue treatment stimulates the production of collagen in the underlying layers of the dermis. Morpheus8's modular tips enable procedures to be customized for large or small body areas.

- **Darker Skin Tones**
Morpheus8 effectively remodels skin and tissue with minimal risk of post-inflammatory hyperpigmentation. Patients should expect little to no thermal damage to skin types I – VI.

How Does Morpheus8 Work?

By combining radiofrequency, microneedling, and fractional treatment, Morpheus8 can target a wide range of problem areas of the skin. Small microneedles penetrate the skin and heat the tissue beneath it, which will then stimulate the production of collagen. Using microneedles allows us to target deep layers of the patient's skin and begin to remodel their collagen for incredible anti-aging effects.

Morpheus8 is currently the only treatment that can mold the fat stored beneath the skin to achieve these optimal results. It does this by contouring and refining the subdermal layers to enable a more detailed approach to naturally sculpting the face and body.

Visible results may be seen within just a few days of the initial treatment, but after multiple weeks, you should begin to see more noticeable results, with continued improvements in the months following the initial treatment. Results vary from patient to patient, but for optimal results, you can expect to undergo a series of treatment sessions.

How do I know if I am a good candidate for Morpheus8?

Morpheus8 is suitable for most healthy men and women looking for a non-surgical solution to reduce the signs of aging. It is suitable for all skin types, whether you have dry, normal, oily, or sensitive skin. The Morpheus8 is not recommended for anyone with a pacemaker.

How quickly will you see results?

While every patient's skin is unique, Morpheus8 results can be seen in as few as three days, with the most noticeable results appearing after 1 month. You may continue to see improvements months after treatment as it takes collagen up to 6 months to fully form. We recommend three treatments spaced out 4 to 6 weeks apart for best results, although there is no upper limit on how many treatments you can have. Skin-tightening results can last, on average, 2 to 5 years.

What conditions can be repaired with Morpheus8?

Morpheus8 can help improve the appearance of:

- Excess fat in the face and neck
- Mild sagging and jowling in the face and neck
- Uneven or rough skin texture
- Acne scarring and other scars on the face or body
- Deep lines and creases
- Sun damage
- Enlarged Pores

- Stretch Marks

What are the Benefits of Morpheus8

Morpheus8 is proven to be a safe and effective way to achieve younger-looking skin without the need for invasive surgical procedures.

- Uncovers natural, youthful contours
- Reduces the appearance of deep lines and wrinkles
- Diminishes the appearance of fine lines and wrinkles
- Helps reduce discoloration, hyperpigmentation, or scarring
- Refreshes the complexion for a youthful glow
- Minimizes the effects of sun damage
- Reduces and eliminates stretch marks
- Smoother skin and improved skin texture
- Can be used on small or large areas, including areas of the face and neck
- Reduces treatment time
- Minimizes risk of skin injury
- Customizable treatment options
- Safe on all skin types
- Little to no downtime
- Improved confidence

What is Morpheus 8 Body?

Morpheus8 Body is the first and only FDA-cleared technology to provide deep 8mm subdermal adipose tissue remodeling. With a unique large surface tip consisting of a matrix of 40 thin gold-coated microneedles and a thermal profile of 7mm + an additional heat profile of 1mm, Morpheus8 Body can be programmed to quickly treat large tissue areas at the deepest levels of RF available.

Equipped with Burst mode RF technology, Morpheus8 Body automatically deploys bipolar RF energy to multi-level treatment depths in a single cycle. The ability to target tissue sequentially at three levels, in millisecond intervals, allows for a significant reduction in treatment times, minimizes skin injury, increases treatment uniformity, and enables customized full-body fractional procedures.

What areas can Morpheus 8 Body Treat?

- Large Body Areas
- Arms
- Above the knees
- Inner thighs
- Abdomen
- Back
- Buttocks

What Sets Morpheus8 Apart From Other Microneedling Treatments?

Morpheus8 is a Subdermal Adipose Remodeling Device (SARD) and is one of the only devices that is FDA approved to remodel underlying fat. Since it is highly customizable, it can sculpt and tighten the appearance of the face and body at its most powerful settings. At gentler settings, Morpheus8 can deliver significant improvements in skin, including tightening, smoothing, brightening, and more.

What is the benefit of fractionated energy?

Fractionated RF energy is a scientifically proven method to reduce wrinkles and rebuild collagen and fat. It is minimally invasive, using a matrix of micro pins to renew deeper layers of the skin with almost no patient downtime.

What is the downtime with Morpheus8?

Since patient downtime is minimal, makeup can be applied 1 to 2 days after the treatment. Patients should expect to see micro lesions a few days after treatment and slight redness for up to 1 week, depending on treatment parameters.

Who can use Morpheus8?

The benefit of Morpheus8's color-blind technology is that it can be used on all skin types. The unique properties allow even darker tones to be treated with little risk of post-inflammatory hyperpigmentation, which is common with other resurfacing methods.

Can Morpheus8 be used on my face?

Morpheus8 can treat areas of the face with fine lines, wrinkles, or scars. The most common areas are the upper and lower eyelids, the mouth and cheeks, and the neck.

Is Morpheus8 painful?

We do our best to make every treatment comfortable. Microneedling with radiofrequency may feel slightly uncomfortable in certain areas. However, our topical numbing cream makes treatment much more pleasant than many patients expect.

What post-procedure care is required after Morpheus8?

An ointment is applied for 48 hours after a treatment. After that, moisturizer, makeup, and sunscreen may be applied. Mild swelling and redness and minimal to no bruising may persist for a week. There is no oozing or discomfort afterward. It is important to avoid direct sun exposure and use good, broad-spectrum sunscreen every day. In addition to reducing the future risk of skin cancer, sunscreens also reduce wrinkles, slow the aging process, and protect your results.

What is the cost of the Morpheus 8 treatment?

See attached form.
