

Characters

Simple and more complex characters will be priced less and more based on their design, respectively. Complexity of fur patterns, tattoos, textures, clothing, and objects they carry factor into this.

Additionally, the price will vary as well depending on the type of polish requested on the picture. (for example, a rough, sketchy line art will cost less than a fully polished ink line art.)

Each second extra character added to a picture will be charged *80% of the original price rounded up*. For example, 2 full body characters for Lineart + Color would be €90 + €72 = €162 TOTAL. (72€ is the second character's price, which is 80% of 90). These are rough estimates and aren't final and depend on how much of them are seen in the commission.)

Prices:

PRICE per CHARACTER (<u>standard design/</u> <u>minimal detail</u>) ROUGH ESTIMATE :	HEAD / CLOSE-UP / SMALL EDITS (headshot or specific area of the body)	HALF BODY / BUST (partially obstructed body, or bust with arms included.)	FULL BODY (head, torso, arms -and legs are all visible.)

Backgrounds

Backgrounds are priced as if they were another character.
The price will be determined depending on their size in proportion to the whole picture or frame, if they're coloured or shaded, and the amount of detail in them.

Abstract Background	Splats of color, shapes, lines, hearts, stars... Example: A background filled with paw pads.	€ 0 ~ € 30
Simple Background (Recommended!)	A room with basic furniture and decoration... (usually blurry) Example: A room with a bed and closet, etc.	€ 30 ~ € 60

Detailed Background	<p>Defined objects, items, decoration and backgrounds.</p> <p>Example: A library with books and shelves, drawn portraits, etc.</p>	<p>€ 60 ~ € 120</p>
Full Background	<p>Full detail and effort placed on the environment.</p> <p>Example: A huge stadium with an audience, lights, advert signs, etc</p>	<p>€ 120 +</p>

Animation

~~Note: Animation commissions are currently limited to those pledged on Patreon (€5+).~~

Prices will be discussed with the client, since there's MANY variables in frame rate, type, style, length and background. Oiruse tends to animate frame by frame at roughly 12 to 24 fps. He can animate pixel art too!

[!] Approximation :

**FULL BODY
SINGLE CHARACTER**

(standard design)

**PRICE for 1 SECOND
STARTING at:**

- *the complexity of the character(s).*
- *the action taking place.*
- *the shots or angles it is drawn from.*
- *the amount of frames necessary to be drawn.*
