

Akvelon Inc.

Position: Product Owner

About us

Akvelon Inc (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to learn from and work with leading engineers of world-renowned companies.

About project

The client is a Fortune 500 Healthcare company, employing nearly 100,000 associates dedicated to serving more than 118 million people in the United States at every stage of health.

It is a significant player in the healthcare industry, providing individual and group health plans and dental and vision insurance. With its extensive workforce and broad customer base, our client plays a crucial role in managing health benefits and facilitating access to essential medical services nationwide in the US.

The Akvelon will help the client with their operation BI reporting. As a first step, our team will clarify project needs and present value and benefits to the client to start the onboarding, and then will manage client ETL processes, perform required data transformations and data modeling, and create new Power BI dashboards.

Responsibilities

- Working closely with stakeholders to understand their needs and requirements of the planned Power BI solution
- Defining and maintaining a prioritized product backlog, reflecting business priorities and value
- Translating business requirements into clear and concise user stories for the development team

- Defining required metrics and measures, creating wireframes and mockups of planned BI dashboards
- Regularly communicating with stakeholders to gather feedback, sharing progress, and ensuring alignment with business objectives
- Ensuring seamless integration of Power BI solution with existing financial systems and processes
- Developing and maintaining user documentation for the BI solution

Requirements

- Expertise in Business Intelligence and analytics tools, especially Power BI
- Understanding of data modeling, visualization techniques, and best practices in BI
- Knowledge of financial processes, terminology, and key performance indicators (KPIs)
- Familiarity with financial reporting requirements and compliance standards
- Excellent interpersonal and communication skills to effectively collaborate with stakeholders
- Proven experience as a Product Owner or similar role in BI or analytics projects
- Experience in creating wireframes and mockups for BI dashboards, proficiency in using tools such as Balsamiq, Sketch, or other design tools
- Familiarity with Agile methodologies, particularly Scrum, and experience working in agile development environments

Nice to have

- Understanding of data extraction, transformation, and loading (ETL) processes

Our benefits

- Paid vacation, sick leave
- Official state holidays

- Professional growth while attending challenging projects and the possibility to switch your role, master new technologies and skills with company support
- Flexible working schedule: 8 hours per day, 40 hours per week
- Personal Career Development Plan (CDP)
- Employee support program (Discount, Care, Heals, Legal compensation)
- Paid external training, conferences, and professional certification that meets the company's business goals
- Internal workshops & seminars
- Possibility of relocation to the USA

Please send your resume / questions to our mail (career@akvelon.com).
We will be glad to see you in our team!
