

Erasmus+ Learning Programme for Activities in Group Mobility of School Pupils

1. Information about the learning mobility

Field	School Education
Activity type:	Group Mobility of School Pupils
Mode:	Physical – face to face activities
Start date:	[17/11/2025 – first day of activity at the hosting school]
End date:	[21/11/2025 - last day of activity at the hosting school]
Participants' profile	<p>The participants are high school students aged 15 to 18, coming from various classes and academic tracks. They are enrolled in programs focused on Economics, Accountancy, Tourism, Gastronomy and Commerce at their home school. Their studies combine both theoretical instruction and practical training, with a set number of weeks allocated to hands-on experience based on their field of specialization. In addition to their vocational subjects, these students share key educational goals: strengthening both individual and group management skills.</p> <p>Taking part in this group mobility experience also gives them the chance to improve their foreign language abilities—especially in English—and enhance their ICT competencies while being constantly involved in individual and group activities. Through a range of individual and collaborative activities in a new cultural environment, they will learn to adjust to unfamiliar situations and develop essential social skills such as observation, active listening, empathy, and teamwork.</p> <p>[Briefly describe the profile of the participants in the group activity: the education programmes they are attending at their home institution; their age groups; main learning needs; language competences, etc.]</p>
