

Expansion of Health Care Coverage to Include Reproductive Health Care

Whereas recent actions by the Supreme Court and state legislatures have deprived members in some states from having the same rights to reproductive health care options that members in other states maintain; and

Whereas dozens of large corporations have expanded their health care coverage to include travel out of state, if necessary, to obtain an abortion, including paying for travel and lodging when required; and

Whereas at least two of the largest independent electric vehicle manufacturers, Tesla and Rivian, include this coverage for their employees; therefore

Be it resolved that we seek to make a full range of reproductive health care options available to our membership, regardless of the state in which they live; and

Be it further resolved that we meet or exceed the coverages provided by non-union facilities such as Tesla and Rivian.
