

## The Hiring Ecosystem

Everything you need to hire well, so your next new hire makes things easier instead of adding one more person waiting on you.

What's inside:

- Why You Need a Hiring Ecosystem — the thinking behind why ad hoc hiring keeps costing you, and what a real system looks like in its place
- Employee Value Proposition Exercise — get clear on why a great candidate would actually choose you, so you stop competing on salary alone
- 7 Types of Interview Questions to Ensure a Good Hire — the question types most founders never use, with samples ready to steal
- The Hiring and Recruiting Process — a full playbook from job posting to offer letter
- Onboarding Operating System, including a 30 Day Training plan — so new hires ramp up fast and stick around

Video and worksheet based, move at your own pace, yours to reuse every time you hire again.

\$47. One time.
