Name: _____ Grade: 7/____ Marks
_____/20**Unseen Reading: Read the text and answer the given questions.**

(____/10)

Transportation plays an important role in people's daily lives. It helps individuals travel safely, quickly, and comfortably from one place to another. Modern transportation systems have made the world more connected than ever before.

First, public transportation such as buses, trains, and subways allows many people to travel at the same time. This reduces traffic on roads and helps protect the environment by lowering pollution. In busy cities, public transport helps people reach schools and workplaces on time.

Next, technology has improved transportation safety. Cars now have seatbelts, airbags, and warning systems that alert drivers to dangers. Traffic lights and road signs guide drivers and pedestrians, reducing accidents. These safety measures save thousands of lives every year.

Transportation is also important during emergencies. Ambulances, fire trucks, and police vehicles use fast and reliable transport to reach people in need. Good roads and clear directions help emergency services respond quickly.

Finally, transportation is most effective when used responsibly. Following traffic rules, using safety equipment, and choosing eco-friendly options like cycling or public transport can make travel safer for everyone. While transportation cannot remove all risks, it makes movement easier and safer.

According to the passage:**1. What is the main purpose of transportation?**

A) Entertainment

- B) Safe and quick movement
- C) Online communication

2. **How does public transportation help the environment?**

- A) By increasing traffic
- B) By reducing pollution
- C) By using more fuel

3. **Which of the following is an example of public transportation?**

- A) Bicycle
- B) Bus
- C) Skateboard

4. **How has technology improved transportation safety?**

- A) By adding games in cars
- B) By installing safety features
- C) By increasing speed

5. **What helps reduce accidents on roads?**

- A) Music systems
- B) Traffic lights and road signs
- C) GPS apps

6. **Why is transportation important during emergencies?**

- A) It helps people travel for fun
- B) It allows quick response to people in danger
- C) It reduces fuel costs

7. **Which vehicles are mentioned as important in emergencies?**

- A) Taxis and buses
- B) Ambulances and fire trucks
- C) Trains and airplanes

8. **What does responsible use of transportation include?**

- A) Ignoring traffic rules
- B) Using safety equipment
- C) Driving faster

9. **If you were to improve transportation in your city, what would be most helpful?**

- A) More traffic jams
- B) Better public transport and safety rules
- C) Fewer road signs

10. What is one problem with transportation systems?

- A) We do not need them
- B) They cannot make travel 100% safe
- C) They stop all accidents

Vocabulary
