

Ancestry Story

<><>

1. Gather your gSlide presentations from the **[Blue Square] 7 Generation** and the **<Black Diamond> Different Circumstances** Simulations.
2. Choose the slides that are *most important* and copy them into a *new gSlide presentation*.
3. Create a visual representation/model of the 3 versions of your organism:
 - a. The Original Organism (at the end of the **Green Circle** Tasks)
 - b. Your Organism after the first 7 Generation Simulation (at the end of the **Blue Square** Tasks)
 - c. Your Organism after the first 7 Generation Simulation (at the end of the **Black Diamond** Tasks)
4. **Create a Screencast** of your gSlides using [WeVideo](#) and use a voice-over to respond to the *following prompts*:
 - a. **Compare** your organism after each 7 Generation Simulation with the **original organism**.
 - *Discuss the main differences that set each of the versions of your organism apart.*
 - b. Identify **major “life events” that impacted the traits and behaviors** of each organism that adapted to the circumstances throughout the two different 7 Generation simulations.
 - *Reference your gSlides and the specific scenarios your organism survived that cause changes to their traits and behaviors.*
