

Mr. Stark's 6th Grade Science Remote Learning

5/25/20 - 5/29/20

Things to look forward to...

1. What kind of rocks are there in Rutland and around Central Massachusetts?

Goals and Objectives:

Students will...

1. Students will identify typical rock structures found throughout Massachusetts and how those rocks (resources) are unevenly distributed due to tectonic forces, glaciation, and other natural forces.

Important Documents (all assignments are posted in Google Classroom by 8am on the day stated):

→ Wednesday's Google Classroom Posting (there will only be one posting for this week since this is a more time-consuming and comprehensive activity)

◆ Activity: [Geology in MA worksheet](#)

- Looking at the Evidence around MA
 - [Geologic survey of Massachusetts](#) and the [Towns of MA](#)

→ Google Meetup → No Meetup this week
