Introduction [Candara, bold, 12pt]

The introduction is written in Candara, size 11, with 1.15 line spacing. The introduction should contain (1) General academic or background anxiety. (2) Previous literature review (state of the art) as a basis for scientific novelty statements of the article to justify the novelty (there must be references to journals published in the last 10 years. No "library review" is allowed in research reports (thesis, thesis and dissertation), but it can be presented as a review of the previous literature. (3) Gap analysis, a statement of the gap or novelty statement, or the unique difference of this research compared to previous studies, or in terms of the importance of the research, or comparison of uniqueness with previous research. (4) Research Question, the problem must be clear and requires research to solve the problem. For Arabic writing or Qur'an verses, the Traditional Arabic font size is 16. Foreign-language words or phrases are written in italics, while Arabic-Latin transliteration refers to Arabic-Indonesian transliteration according to SKB 3 Menteri. The body of the paper must be elaborated between 5000 - 9.000 words (maximum), including abstract and references.

Method [Candara, bold, 12pt]

This method is written in a descriptive style and should provide a statement regarding the research methodology, including the type of research, research approach, data source, and analysis method. The author should explain the mechanism for analyzing the Sharia issues. This method, as much as possible, gives the reader an idea of the method used; it is optional and only for an

original research article. **(For Conceptual Ideas without Research Method).**

Results and Discussion [Candara, bold, 12pt]

The discussion contains theories that assist researchers in analyzing data to make a summary or synopsis of the data and relationships, and to suggest trying new things or even giving birth to new theories. There are at least three functions of theory that have been agreed upon by scientists, namely: (a) describing, (b) explaining, and (c) predicting. The Arabic-Latin transliteration refers to the Arabic-Indonesian transliteration as per the 3 Ministerial Decrees.

The discussion also contains sub-chapters with research results.

This chapter contains research findings and discussion (can be described in sub-chapters). Write down the findings obtained from the results of research that have been carried out, and adequate data must support them. Research results and findings must address the questions/problems and be consistent with the research objectives outlined in the introduction. If there is a table, it is written in the following format:

4**Conclusion** [Candara, bold, 12pt]

Closing contains conclusions and suggestions (if any). It should be written in paragraphs, not in numeric or bulleted lists. The conclusion describes the answers to research questions/problems and/or the research objectives or findings obtained. The conclusion does not repeat the results and discussion, but rather summarizes the findings, as expected in the objectives or hypotheses. Suggestions present tasks related to further ideas from the research.
