By Rebecca Halleck

To edit or update an existing Library page, click the "Edit This Page" button at the bottom of the page or the "Edit" link at the top. This will take you to the corresponding Google doc that powers the page.
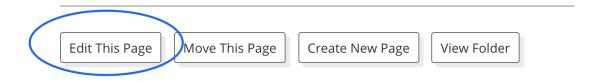

How Library Works

By Isaac White. Last edited by Rebecca Halleck 17 minutes ago.   Edit ✎

Library was created as a way to document, share and find information.

You can search for a specific topic, view documentation by department or browse all available pages. Because Library is built using a Google docs framework, you can easily create new pages or migrate existing docs to the Library team drive to share with your colleagues. Please keep in mind that all documents on Library are visible to anyone with access to the team drive.

Browse the pages below for specific instructions on all the ways you can add to Library.

| Edit This Page | Move This Page | Create New Page | View Folder |

Be patient: any edits made to a page may take a few moments to update.
