

[Hoping deadly deer disease doesn't come here](#) January 29, 2017 Pennsylvania

Wilkes Barre Times-Leader

... CWD has been found in 11 captive deer - those on deer farms, since 2012. There are 23,000 captive deer on 1,100 breeding farms in the state ... the latest case ... the deer was raised on a farm in Fulton County ... for several years, and sold to the Franklin County facility in August 2016. Both farms are now under quarantine ...

Chronic Wasting, [Wrap up of 2017](#) January 5, 2017 Pennsylvania, Carlisle Sentinel

... The effects of the spread of chronic wasting disease reached eastward across Cumberland and Adams counties in 2017 ... Throughout the state since 2012, 44 captive deer have been confirmed to have had CWD. The disease has been confirmed in more than 60 free-ranging deer...
