

# Industrialist Party

“Doing what’s right for an ever-changing galaxy”

## **Forward Together**

The Industrialist Party advocates and works to further the voices of the industry. Since the dawn of civilizations, there have been those of us who advocated free enterprise and we do not take this responsibility lightly. We represent more than what our opponents would lead you to believe we represent corporate owners and operators laborers, and consumers.

## **The Three Core Columns of the Industrialist Ideology**

- 1. Innovation-** Innovation is the one aspect of an economy that can not be limited. Workforce, resources, and all other aspects reach a maximum limit; however, innovation is an unlimited aspect of the economy.
- 2. Competition-** Competition is the fundamental glue that constructs the galactic economy. Competition for higher wages, lower prices, generating more profits, which inevitably leads to innovation, progress, excess, and prosperity. If allowed to occur naturally, the competition will naturally raise standards of living and wages, and lower prices for the average consumer.
- 3. Industry Must Thrive-** While some small amount of regulation is necessary, such as the anti-trust laws, we must always beware to not allow the Republic to limit Free Business Expansion.

## **Important Party Stances and Goals**

**Healthcare-** Healthcare is to be privatized and allowed to compete. Competition between hospitals will in time create better patient quality, cut prices, and lead to mutually satisfactory service for all involved.

**Education-** While all people deserve the right of the ability to read and write and basic mathematics. Anything beyond that is up to the local cultural traditions, though primary and secondary education must at least be partially privatized. To ensure the chance for competition and allow for better quality education.

**Welfare-** Should be the goal of any good welfare system to lift the poor and impoverished into careers. In time through hard work they should be able to pull themselves up by their bootstraps if they fail they deserve such.

## **Conclusion**

In conclusion, the Industrialist party stands for the people's right to help themselves. Industrialists represent the wheels of industry in the galaxy and it is their duty to ensure that the wheels keep turning no matter what. Whether you are a fledgling entrepreneur, a stockbroker in downtown Republic City, a Noble who wants to maintain his family wealth, or a simple labor vote Industrialist we do what's right.
