Chat during the day is prohibited.

N1 falls: chat is available. The kill command is ##kill.

Can you guys confirm that you are able to edit this document?

.

Confirmed. Fucking lost track of the end of day during my commute. Thats gonna be hard to sell, ironically, as its the only time I'll be telling the truth this game. Also, I'm pretty sure Clon has a role, so we should consider killing him.

Confirmed. Sure. I'm new to all this so am ok with that.

##kill clontroper5

Btw do you have any role powers?

You are both standard Mafia Goons; no special role powers, besides being able to talk to each other at night and getting one kill at night.

Thanks Bertie.

Red, I expect them to come after me today. Honestly, it wouldnt be a bad idea for you to lead the charge, if you can be the first person to post something about how "Hey didn't Madaghmire say he was going to vote before the deadline" and then drop a vote on me. Best if you can beat the others to it. They wont see it coming because they'll treat you with kid gloves probably until its too late. If I cant talk my way out of it, then good luck with the rest of the game! Kill Gnips second round, he's most dangerous in late game scenarios when he can rely more on logic and less on reads. (Unless it becomes obvious that theres a better target because of a role reveal or whatever)

Night chat is open.
