

[Another gray wolf has made its way to Northern California](#) May 9, 2021 msnNOW
...He's the second documented wolf to do so this year, wandering hundreds of miles south before arriving in northeastern Siskiyou County on May 4. Though his pack of origin remains unknown,,

[Wildfire Brought Wolves Back to Southern California after 150 Years](#) November 21, 2023
Scientific American

... After the smoke cleared on 2021's Windy Fire, a pack of wild wolves settled in the burned-out area just three hours north of Los Angeles. It's the first time in about 150 years that [gray wolves](#) have roamed this part of the Golden State...When fires kill trees, more sunlight is able to reach the blackened soils; this stimulates dormant plants such as grasses to sprout. The nutritious grasses attract deer and other species, offering wolves a buffet..,
