

# **Terms of Service**

## **General terms**

**By sending a commission request you automatically agree to the following Terms of Service.**

Those Terms of Service are provided "as-it". I reserve the right to choose whether something is okay or not. In any doubt, ask me.

1. I have the right to change the Terms of Service at any time. This will not affect already ordered commissions.
2. I have the right to refuse the commission without needing to explain the reason.
3. Only SFW artworks. May accept mild violence [like battle scenes or horror.]
4. You are not allowed to use commissioned or\and non commissioned artwork or part of it in any form or shape in any piece of media related to NFT and AI.
5. Commissioned artworks for personal non-commercial use only.
6. You can share commissioned artwork in your personal gallery, but you must provide credit and a link to my gallery. My signature must remain on the artwork.
7. The commissioned artwork must not be posted in high resolution.
8. I retain the rights to the commissioned artwork which means I can reuse it in any subsequent project and use it as an example of work in any of my portfolios.

## **Workflow**

1. Work starts after the payment is received.
2. Quick sketchy thumbnails are sent to ensure the pose and composition are good
3. Work on the commission continues until it's finished. Clients can request work in progress preview images during that process. If they do, they're encouraged to give feedback.
4. Preview of the finished image is sent to the client for approval. Small final tweaks are possible if needed.
5. Final, high-resolution image is sent to the Client. Lower resolution images will be included as well.
6. Turnaround greatly depends on the commission type and my current availability. Clients should ask about it if they want to know how long it will take to complete their commission.
7. More additional work beyond the initial agreement may be refused.

## **Payment methods**

1. All prices in USD
2. Payments made upfront via Boosty [USD]. Or through LambdaKat [PayPal].
