

### Short-term/Lab Team Charter Questions

These were developed during a summer professional development program by

Answer the following as a team to develop and define your teamwork expectations for this lab.

- Discuss what personal goals each person is working towards by taking the lab?
- How much lab experience does each person have? Does anyone have experience with this specific topic?
- What is one obstacle (inside or outside the classroom) that each person might encounter during their time in this group?
- How will the work be divided?
- Think back to your previous group projects or labs. Is there anything from those experiences you would like to incorporate or avoid for this lab?
- What format will you communicate via? (e.g. email, groupme)

#### *Optional start to a teamwork expectations:*

As a lab group we will ensure that everyone's ideas are treated with openness and respect, participation is distributed equally, everyone's input is gathered before making a decision, and the team is kept on track to complete lab objectives.
