Privacy Policy for YouTube Music Bridge by ReAI Kyiv 2026

Last updated: November 13, 2026

This Privacy Policy explains how the YouTube Music Bridge by ReAI Kyiv 2026 Chrome extension ("the Extension") handles your information.

1. Overview
The Extension serves a single purpose: connecting your active YouTube Music (https://music.youtube.com) playback session with the local Elgato Stream Deck application installed on your personal computer.

2. Information We Do NOT Collect
- No Personal Data: We do not collect names, email addresses, Google account details, passwords, payment info, or IP addresses.
- No Browsing History: The extension operates strictly on https://music.youtube.com/* and does not track your browsing activity across any other websites.
- No Analytics or Trackers: The extension contains zero tracking scripts, telemetry, Google Analytics, or third-party advertising SDKs.
- No Cookies or Credentials: The extension does not read, access, or store your YouTube or Google session cookies or authentication tokens.

3. How Data is Handled Locally
- Playback Telemetry: To display live playback info on your Stream Deck buttons and dials, the extension reads:
  * Track Title, Artist, and Album Name
  * Album Artwork URL and Video Frames (for live visualizer and screensaver)
  * Playback position, duration, volume level, like status, and repeat mode
  * Lyrics (displayed locally on the Stream Deck screen)
- Local Transmission Only: All playback data is sent exclusively over a secure local WebSocket connection (ws://127.0.0.1:47563) directly to the Stream Deck plugin running on the same computer. No data ever leaves your computer or is sent to any external server.

4. Third-Party Services
The Extension interacts only with the active music.youtube.com web page directly in your browser. It does not share or sell data to any third party.

5. Contact & Developer Information
- Developer / Creator: ReAI Kyiv 2026
- Music & Artist Page: https://www.youtube.com/@UA_resonai
